Highlight

- 150+ peer-reviewed journal publications, Google Scholar h-index 55, i10-index 129, total citations 11,000+.
- 15 issued patents, 30+ patent applications.
- 6 active extramural research grants, with cumulated extramural research funding over $20M.
- Graduate Faculty for PhD programs (endorsed to chair) of Biological Design, Biomedical Engineering, Electrical Engineering, Physics, Chemistry, and Biochemistry.
- Mentored/co-mentored 23 postdocs, 42 PhDs (8 chaired+7 chairing), 22 master's students, and 40 undergraduate students.
- Taught one graduate course (BME 598 Biosensing Technologies) and three undergraduate courses (BME 340, 423, and ASU101).
- Editorial board member of *Biosensors, ACS sensors*, and *Med-X.*
- Reviewer for NIH and several other funding agencies, and 100+ journals.

Education and Training

- B. S. in Biological Sciences & Biotechnology, Advisor: Prof. Sen-fang Sui, Tsinghua University, Beijing, China, 1985.09-1990.07
- M. S. in Biophysics, Advisor: Prof. Sen-fang Sui, Tsinghua University, Beijing, China, 1990.09-1993.03
- Ph. D. in Physical Chemistry, Advisor: Prof. Roger M. Leblanc, University of Miami, Miami, Florida, 1994.09-1999.07
- Postdoctoral training in Physics, Advisor: Prof. Nongjian Tao, Florida International University, 1999.09-2001.07
- Completed Research-Based Instructional Strategies in Engineering (RISE) Instructional Workshop hosted by Ira A. Fulton Schools of Engineering Learning and Teaching Hub, Arizona State University, 2021.09 – 2022.04.

Research Interests

- Develop novel biosensors and bioinstrumentations for biomedical research, drug development, and disease diagnosis
- Label-free optical and electrochemical sensing for chemical and biological targets
- Current focus:
  - Plasmonic and optical functional imaging for molecular interactions, neuron cell activities, single proteins, virus, bacteria, and live cells
  - Charge-based detection of small molecules and single proteins
  - Imaging-based rapid bacteria identification and antibiotic susceptibility test
  - Digital immunoassay for rapid and precise detection of blood biomarkers

Professional Experiences

1993.04 – 1994.07 Research Assistant, Tsinghua University, Department of Biological Science and Technology, Beijing, China

- Conducted research in membrane biophysics using Langmuir monolayer as a model system, in Prof. Sen-Fang Sui's lab.

1994.09 – 1999.07 Graduate Teaching and Research Assistant, University of Miami, Department of Chemistry, Miami, FL

- Teaching assistant for general chemistry and organic chemistry classes and labs for 4 years.
- Conducted research on Langmuir monolayer and Langmuir-Blodgett films for sensor development and material characterization.

1999.09 – 2001.07 Postdoctoral Research Associate, Florida International University, Department of Physics, Miami, FL

- Conducted research and development on multi-wavelength surface plasmon resonance spectroscopy.
- Conducted research on chemical sensor and biosensors based on optical and nanotechnology.

2001.09 –2008.11 Senior Scientist, Principal Investigator, ICx Nomadics Inc. (now FLIR), Stillwater, OK

- Conducted research and development on several nanoparticle-related projects for LED, sensing, fluorescence labeling, and therapeutic applications, and had hands-on experiences in nanoparticle synthesis, surface modification, conjugation, and characterization.
- Conducted research and development on surface plasmon resonance spectroscopy-based sensors, amplified fluorescence polymer-based sensors, and cell-based sensors, and had hands-on experiences in optical instrument design and implementation.
- Conducted research and development on several tissue-engineering projects that used inverted colloidal crystals as tissue scaffolds for different applications and had hands-on experiences with mammal cell culture and characterization.
- Responsible for grant proposal development, project management and reporting, instrument and methodology development and implementation, and mentoring of junior researchers.

2008.12-2015.06 Associate Research Professor, Biodesign Center for Bioelectronics and Biosensors, Arizona State University, Tempe, AZ

- Conducted research and development on optical biosensors for biomedical applications
- Responsible for proposal and manuscript writing, project management and reporting, instrument and methodology development, mentoring of multiple graduate students and postdocs.
- Graduate Faculty for PhD programs (endorsed to chair) of Biological Design

2015.07-2021.06 Research Professor, Biodesign Center for Bioelectronics and Biosensors, Arizona State University, Tempe, AZ

- Conduct research and development on optical biosensors for biomedical applications
- Responsible for proposal and manuscript writing, project management and reporting, instrument and methodology development, and mentoring and managing a lab with 10~15 graduate students, postdocs and visiting scholars.
- Graduate Faculty for PhD programs (endorsed to chair) of Biological Design

2021.07-present Associate Professor, School of Biological and Health System Engineering (SBHSE), Ira A. Fulton Schools of Engineering, and Biodesign Center for Bioelectronics and Biosensors, Arizona State University, Tempe, AZ

- Conduct research and development on optical biosensors for biomedical applications
- Responsible for proposal and manuscript writing, project management and reporting, instrument and methodology development, and mentoring and managing a lab with 10~15 graduate students, postdocs and visiting scholars.
- Teach undergraduate and graduate-level courses at SBHSE
- Graduate Faculty for PhD programs (endorsed to chair) of Biological Design, Biomedical Engineering, Electrical Engineering, Physics, Chemistry, and Biochemistry.

2025.05-present ***Associate Professor and Course Director, Applications in ME 1, Department of Foundational Science, the John Shufeldt School of Medicine and Medical Engineering, ASU Health, Arizona State University, Tempe, AZ***

- Serving on school committees
- Development of course materials and curriculum

2025.10-present ***Associate Director, Center for Bioelectronics and Biosensors, the Biodesign Institute, Arizona State University, Tempe, AZ***

- Assisting the Center Director in developing and implementing the center's strategic goals and initiatives.
- Provide leadership in shaping research, education, and outreach priorities.
- Serve as Acting Director in the Center Director's absence.
- Representing the center in meetings with university leadership, funding agencies, philanthropists, and external stakeholders.

Professional services

Professional Membership

- 1995- American Chemical Society
- 1995- Beta Chapter of Alpha Epsilon Lambda
- 2003-2004 Tissue Engineering Society International
- 2004-2005 Association for Laboratory Automation
- 2009- The Electrochemical Society
- 2012- American Physical Society
- 2025- American Association for the Advancement of Science

Editorial and Conference Service

- 2019.5 - Editorial Board Member of *Biosensors*: https://www.mdpi.com/journal/biosensors/editors
- 2023.01 - Editorial Advisory Board Member of *ACS Sensors* *(https://pubs.acs.org/page/ascefj/editors.html)*.
- 2023.01 - Editorial Board Member of *Med-X* (https://www.springer.com/journal/44258/editors).
- 2020.09-2021.03 Guest Editor for the *ACS Sensors* Special Issue: Commemorating NJ Tao, 2021, *6* (2).
- 2021-2022 Guest Editor for Focus Issue on Biosensors and Nanoscale Measurements: In Honor of Nongjian Tao and Stuart Lindsay, the Journal of The Electrochemical Society. https://www.electrochem.org/ecs-blog/focus-issue-on-biosensors-and-nanoscale-measurements
- 2022.08- 2023.05 Organization committee member for 3rd International Electronic Conference on Biosensors: https://sciforum.net/event/IECB2023
- 2023.10.25 Session Presider of Roger M. Leblanc Symposium of Molecular and Nano Sciences, SERMAC 2023, Durham, NC.
- 2023.09-2024.03 Organization committee member for Biodesign Center for Bioelectronics and Biosensors 20-year anniversary symposium.
- 2024.11- 2025.05 Organization committee member for 5th International Electronic Conference on Biosensors: https://sciforum.net/event/IECB2025

Grant Reviewer

- National Institute of Health study section ad hoc member of:

  2009.06 NIH Stage I reviewer for NIH ARRA-Challenge grant program (ZRG1 BST-M (58))

  2012.02.21-23 ZRG1 BST-T (90) review panel, Bioengineering Sciences and Technologies, Academic Research Enhancement Award Grants (R15)

  2014.03.27 NCI/IMAT review panel, Early-Stage Innovative Technology Development for Cancer Research (R21)

  2016.03.08 National Cancer Institute Special Emphasis Panel (ZCA1-TCRB-6 (M3)) for Innovative Molecular Analysis Technologies for Cancer Research (RFA-CA-15-002, R21)

  2017.02.07-08 NIH CSR Enabling Bioanalytical and Imaging Technologies (EBIT) study section (R01 and R21)

  2018.10 NIH CSR Enabling Bioanalytical and Imaging Technologies (EBIT) study section (R01 and R21)

  2019.03.29 NIH/NIBIB ZEB1 OSR-E(M2) review panel: Mentored Career Development (K) and Conference (R13) Award Application

  2019.10.10-11 NIH CSR Enabling Bioanalytical and Imaging Technologies (EBIT) study section (R01, R21, R03)

  2020.06.18-19 NIH CSR Enabling Bioanalytical and Imaging Technologies (EBIT) study section (R01, R21, R03)

  2020.11.23-24 NIH CSR NIGMS Special Emphasis Panel Review (2021-01 ZRG1 CB-D (55)) of MIRA Applications (R35)

  2021.06.16-17 NIH/NCI Special Emphasis Panel grant review meeting 2021/10 ZCA1 TCRB-J (O1) R Innovative Molecular and Cellular Analysis Technologies (IMAT)

  2022.08.22-24 NIH/NIAID Special Emphasis Panel, ZAI1 FDS-M (C2) NIAID 2022 DMID Omnibus BAA (HHS-NIH-NIAID-BAA2022-1)

  2022.11.03-04 National Cancer Institute Special Emphasis Panel (ZCA1 TCRB-Q (J1) for Innovative Molecular and Cellular Analysis Technologies (RFA-CA-22-001, R61)

  2023.06.23 NIH/NCI Special Emphasis Panel grant review meeting 2023/10 ZCA1 TCRB-Q (O1) R Innovative Molecular and Cellular Analysis Technologies (IMAT RFA-CA-23-003, R33)

  2024.02.06 NIH/NIAID HHS-NIH-CDC-SBIR PHS 2024-1 Phase I: Development of a Serological Test for Herpes Simplex Types 1 and 2 Infections (Topic 133) (N01) Review Panel

  2024.11.19-20 NIH Small Business: Instrumentation, Environmental, and Occupational Safety, ZRG1 MCST -K (12) study section panel

2025.01.07 NIH/NIAID SBIR (PHS 2023-1) Topic 121 - Artificial Intelligence to Improve Clinical Microscopy for Diagnosis of Infectious Diseases (N01)

2025.06.24-25 NIH/NIAID SBIR ZRG1 NV-N(17) - Biomarkers, Diagnostics and Disease Therapy

2025.12.10-11 NIH/NIAID_2026/01 ZRG1 DCAI-X (12), Small Business - Anti-infective Therapeutics

2026.04.13-14 NIH ZRG1 MCST-k(85), Bioanalytical, Molecular, Cellular Sciences and Technologies

- ACS-Petroleum Research Fund
- 2023.08 Natural Sciences and Engineering Research Council of Canada (NSERC) external proposal reviewer.
- U.S. Civilian Research and Development Foundation
- European Research Council:
  - 2023.03-05 ERD-2023-STG panel PE4 remote referee
  - 2025-04 ERC Starting Grant 2025 reviewer.
- Dutch Research Council:
  - 2022.02 Grant reviewer for Dutch Research Council Open Technology Program 2022.
  - 2024.08 Grant reviewer for Dutch Research Council Open Technology Program 2024.
- India Alliance Fellowship Application:
  - 2021.02 International reviewer of a fellowship application.
- Singapore Programmatic MedTech grant:
  - 2024.10 Reviewer for Singapore Programmatic MedTech grant as an international subject matter expert.
  - 2025.10 Reviewer for Singapore Programmatic MedTech grant as an international subject matter expert.
- 2025.02. Member of the Louisiana Board of Regents Support Fund Research Competitiveness Subprogram (RCS) Chemistry Panel
- 2025.05. Carver Trust research proposal external reviewer.
- 2025.07 Swiss National Science Foundation grant proposal reviewer.

University Service

- 2011.01 - Biodesign Personnel Committee member, ASU
- 2015.05 – 2018.05 Faculty Advisor, Sun Devils Badminton Club, ASU
- 2019.04 Wojcik Scholarship Review Committee member, Biodesign, ASU
- 2020.01-2020.03 Member of Faculty Search Committee: Digital health (all ranks) faculty joint appointment between Biodesign Center for Bioelectronics and Biosensors and the Ira A. Fulton Schools of Engineering
- 2022.08-2025.07 Ira A. Fulton Schools of Engineering Academic Standards Committee member
- 2022.08-2024.07 School of Biological and Health Systems Engineering Barrett Faculty Honors Advisor
- 2023.08-2026.08 School of Biological and Health Systems Engineering Graduate Committee member
- 2023.10-2024.3 Member of Faculty Search Committee: Digital health devices and technologies (all ranks) faculty joint appointment between Biodesign Center for Bioelectronics and Biosensors and the Ira A. Fulton Schools of Engineering
- 2024.01-2024.06 School of Biological and Health Systems Engineering Interim Graduate Program Chair
- 2025.03.06 NSF Research Traineeship Spring Workshop Pitch Competition Judge, ASU, Tempe, AZ
- 2025.05 -2026.08 SBHSE Industry Engagement Committee member
- 2025.05 - ASU Health Grand Rounds CME Planning Committee member
- 2025.08 - Ira A. Fulton Schools of Engineering Dean's Executive Committee member
- 2026.04 - Member of ASU Instrument and Mission Development Lab (IMDL) Core Governance Board
- 2026.08- School of Biological and Health Systems Engineering Undergraduate Committee member

Consulting Service

- 2016.01-2017.09 Luna Innovations Incorporated, Roanok, VA 24011
- 2023.04- Member of the Scientific Advisory Board of Biosensing Instrument Inc.

Community Service

- 2016.05 Grand Award Judge for Biomedical Engineering, 2016 Intel International Science and Engineering Fair (ISEF), Phoenix, Arizona
- 2022.02.01 Participated in SBHSE's BME information session for prospective high school students.
- 2026.03.18 Change the World 2026, exhibition judge.
-

Honors and Awards

- 1983 Second place in Jilin Province at the China National High School mathematics competition
- 1984 Third place in Jilin Province at the China National High School Mathematics Competition
- 1984 Sixth place in Jilin Province at the China National High School Physics Competition
- 1985 Admitted to Tsinghua University with exemption from the National Entrance Examination for Universities
- 1987 Software Computational Simulation of Biochemistry Metabolism Pathway was awarded in the Student Scientific and Technology Competition, Tsinghua University
- 1987 Student Scientific and Technology Competition Award, Tsinghua University
- 1990 Experimental Technique Award, Tsinghua University
- 1991 Guanghua Scholarship, Tsinghua University
- 1993 Laboratory Construction Award, Tsinghua University
- 1993 Mr. Hua Luogeng Memorial Fellowship, Tsinghua University
- 1993 Travel Fellowship, 11th International Biophysics Congress
- 1996 Best Student Presentation Award, Colloid and Surface Chemistry Division's Poster Session, 211th American Chemistry Society National Meeting, New Orleans
- 1997 Max and Peggy Kriloff Graduate Student Travel Scholarship, University of Miami
- 1998 First prize of Physical Science in the Third Annual UM Graduate Student Research & Creativity Forum, University of Miami
- 1998 Outstanding Graduate Student Award, Department of Chemistry, University of Miami
- 1998 Excellence Graduate Research Award, Department of Chemistry, University of Miami
- 1999 Excellence in Graduate Academic Achievement and Research Creativity, Department of Chemistry, College of Arts and Sciences, University of Miami
- 1999 Elected to Who's Who Among Students in American Universities & Colleges, University of Miami
- 2021 Nominated for full membership in Sigma Xi
- 2022 ASU SUN Award for participation in SBHSE's first BME information session for prospective students.
- 2024 Invited for inclusion in the 2024 edition of Marquis Who's Who in America.

Research Support

Active Research Support

NIH NIGMS R35GM164231, 08/10/2026-07/31/2030

Title: Plasmonic and Evanescent scattering microscopy for label-free functional imaging of single molecular and cellular activities

Description: This project aims to develop advanced near-field optical scattering microscopy technologies for label-free, functional imaging of molecular and cellular activities. The novel capabilities will significantly enhance biomedical research, drug discovery, and clinical diagnostics by providing powerful, non-invasive tools for molecular and cellular analysis.

Role: PI

NIH NIAID R01AI189847A1, 06/05/2025-04/30/2030

Title: AI-enhanced LVSim2.0 Technology for Rapid Phenotypic Susceptibility Testing of New and Experimental TB Drugs.

Description: The project will develop a simple, integrated optical-scattering imaging system that enables rapid determination of appropriate drug treatment for patients with multidrug-resistant TB.

Role: Co-PI (50%) (Contacting PI: Haydel).

Biosensing Instrument Inc. Big 157918 (VIA NIH NIGMS R42GM157918), 04/02/2025 - 03/31/2026

Title: Spotting-free Nano-Oscillator Array for Quantification of Virion Displayed Membrane Protein Binding Kinetics

Description: This is ASU sub-award of an NIH STTR fast-track project to develop a spotting-free nano-oscillator array technology for high-throughput measurement of small molecule drug interactions with membrane proteins in their native conformations.

Role: PI

Biosensing Instrument Inc. Big 154550 (VIA NIH NIGMS R42GM154550), 09/01/2024 - 08/31/2027

Title: Plasmonic scattering microscopy for high-throughput in-situ quantification of molecular binding kinetics on single cells

Description: This is ASU sub-award of an NIH STTR fast-track project to develop Plasmonic Scattering Microscopy for high-throughput in-situ quantification of molecular binding kinetics on single cells.

Role: PI

NIH NIGMS R01GM140193, 09/01/2022-08/31/2027

Title: Optical imaging of size, charge, mobility and binding of single proteins

Description: A detection technology based on evanescent field scattering of protein oscillators will be developed to detect and identify proteins, and to analyze protein-protein interactions. The success of the project will lead to a powerful tool to study molecular scale processes in living organisms, to screen drugs and to detect biomarkers, particularly from low volume samples, such as single cells and exosomes.

Role: PI

NSF 2122901, 09/01/2021 – 08/31/2026 (NCE)

Title: PFI-RP: Partnership for Innovation - Avoiding Kidney Injuries with Evidence-Based Smart Technology

Description: To develop a new sensing system to enable urine real-time, point of care (POC), multi-parametric measurements for: 1- monitoring patients at risk for Acute Kidney Injury (AKI) and 2- building AKI prediction models to revolutionize the current practice of nephrology.

Role: Co-PI (PI: Forzani)

Completed

NIH NIAID 1R01AI138993 07/25/2018 - 06/30/2025

Title: Point-of-care antimicrobial susceptibility testing based on simultaneous tracking of multi-phenotypic features of single bacterial cells

Description: To develop a culture-independent technology for point-of-care diagnosis of antimicrobial-resistant bacteria in urinary tract infections within 3 hours, by imaging urine samples directly with an innovative large-image-volume imaging technique and analyzing the data with a machine-learning model. Successful development of the technology will enable precise antibiotic prescriptions and accurate treatment of the patient on the same day of visit.

Role: PI

ASU-Mayo Seed Grant ARI-333334, 07/01/2024-12/31/2025

Title: Development of a Point-of-Care Digital Nano Biosensor for Decentralized Heart Failure Monitoring

Description: Proof of concept development of a Point-of-Care Digital Nano Biosensor for detection of NT-proBNP in whole blood, the biomarker for heart failure monitoring

Role: PI

Lonza Biologics Inc., AWD00039181, 09/01/2024-12/31/2025

Title: Evaluation of optical imaging as a single platform to determine size, charge, and mobility of biomolecules

Description: Evaluation of evanescent scattering optical imaging as a single platform to determine size, charge and mobility of antibody drugs

Role: PI

Biosensing Instrument Inc. Big 143986 (VIA NIH NIGMS R42GM143986), 08/15/2021 - 02/14/2025

Title: Critical angle reflection imaging for label-free quantification of molecular interactions

Description: To develop critical angle reflection imaging (CARi) technology for in-situ measurement of binding kinetics of membrane proteins on the cell surface with single cell resolution.

Role: PI

Biosensing Instrument Inc. Big 139535 (VIA NIH NIGMS R44GM139535), 05/18/2021 - 03/31/2024

Title: Development of a charge-sensitive optical detection system for high-throughput study of small molecule binding kinetics

Description: To develop a commercial microplate compatible prototype instrument using optical fiber probes for high-throughput study of small molecule binding kinetics with charge sensitive detection.

Role: PI

Mayo Clinic Arizona Cardiovascular Research Grant Award, FP00115547, 08/01/2021 – 12/31/2023

Title: Development and Validation of a Rapid, Point-of-Care Digital Immunoassay for High Sensitivity Cardiac Troponin Detection

Description: To develop a point of care digital immunoassay for detection of cardiac troponin with high sensitivity and precision.

Role: ASU PI

NIH NCI IMAT R33CA235294, 03/01/2020 - 02/28/2024

Title: A Virion-Display Oscillator Array and Detection Platform for Quantification of Transmembrane Protein Binding Kinetics

Description: This project develops a virion oscillator microarray technology to measure molecular binding to GPCRs. The success of this project will lead to a long-sought tool to determine cancer-related cellular signaling processes, screen drugs targeting membrane proteins, and validate new therapies for cancer and other diseases.

Role: PI

NIH NIGMS 2R01GM107165, 09/01/2018-08/31/2023

Title: Quantitative label-free imaging of electrical activities in cells

Description: To develop a label-free imaging technology for studying electrical activities in cells with high spatial and temporal resolutions. This unique capability will provide new insights into the roles of electrical activities in many biological processes, including brain and cardiac functions, wound healing and tissue development, and will lead to a new method for screening drugs targeting these processes.

Role: PI

NIH NIGMS 1R01GM124335 07/01/2017 - 04/30/2022

Title: Measuring small molecule interactions with membrane proteins on single cells via detecting nanometer scale membrane deformations

Description: to develop a label-free optical-imaging method to quantify binding kinetics of small molecules to membrane proteins via measuring binding induced nanometer scale cellular membrane deformation.

Role: PI

Genentech Inc. AGR 11/05/18, 10/30/2018 – 10/29/2021

Title: Direct quantification of binding kinetics between phage and mRNA displayed peptide

Description: To develop charge sensitive optical detection (CSOD) technology for measurement of phage displayed peptides binding to protein targets.

Role: PI

Biosensing Instrument Inc., BIG126720 (VIA NIH NIGMS R44GM126720), 5/1/2018 - 10/31/2021

Title: Nano-Oscillator Arrays for Sensitive Plasmonic Detection of Molecular Interaction

Description: The success of this project will lead to a new technology to address the unmet need for quantifying small molecule binding kinetics and biochemical reactions kinetics.

Role: PI

Biosensing Instrument Inc. (Via NIH NIGMS 1R44GM114951-01), 4/1/2015-3/31/2021

Title: An Integrated Microarray Printing and Detection System

Description: To develop an integrated microarray printing and detection system (IMPDS) that enables high-throughput analysis of protein interactions kinetics in microarray or whole-cell based formats.

Role: PI

NIH NCI IMAT R33CA202834 08/01/2016 - 07/31/2020

Title: Charge sensitive optical detection for high-throughput study of small molecules

Description: develops a microplate compatible, charge sensitive detection method using optical fiber probes for high-throughput study of small molecule binding kinetics.

Role: Co-Investigator (PI: NJ Tao)

NIH NIGMS 1R01GM107165, 07/01/2014-06/30/2018

Title: Quantitative label-free imaging of membrane protein interaction kinetics on cells

Description: A new imaging technique will be developed for studying the binding kinetics of membrane proteins in their native cellular environment.

Role: PI

Moore Foundation, 04/12/2013-07/31/2016

Title: Label-free imaging and tracking of single protein-protein interactions

Description: To develop a capability to image the morphology, chemical reactions and charge distributions of a living system with molecular scale spatial and temporal resolution.

Role: Co-Investigator (PI: NJ Tao)

Biosensing Instrument Inc. (Via NIH NIGMS 1R44GM106579), 04/01/2013-03/31/2017

Title: Electrochemically-Enhanced Plasmonic Imaging for Quantitative Proteomics

Description: To develop an electrochemically-enhanced plasmonic imaging (ECEPI) system that enables high-throughput analysis of protein interactions with small molecules and characterization of post-translational modifications in microarray or whole-cell based formats.

Role: Co-Investigator (PI: NJ Tao)

NIH NCI R21CA173205 09/01/2012 - 08/31/2015

Title: Charge sensitive optical detection for high-throughput study of small molecules

Description: develops an optical method to measure electrical conductance, making it possible to map ion channel opening and closing activities noninvasively with high spatial and temporal resolution.

Role: Co-Investigator (PI: NJ Tao)

NSF #1151005 (12010088) 02/01/2012 – 01/31/2016

Title: IDBR: Plasmonic-based electrochemical impedance microscopy for studying molecular binding and cellular processes

Description: This project focuses on developing a plasmonic-based electrochemical impedance microscope (P-EIM).

Role: Co-Investigator (PI: NJ Tao)

W. M. Keck Foundation, 07/01/2011-06/30/2016

Title: A Self-Assembled Nanomechanical System (NMES) for Molecular Detections

Description: To develop a nanoparticle based mechanical resonator with optical/electronics detections for molecular detections.

Role: Co-Investigator (PI: NJ Tao)

Amgen 2012577119 11/13/2012 – 05/12/2015

Title: Evaluate P-EIM technology for membrane protein binding affinities measurement

Description: The goal of the project is to establish P-EIM as a new platform for determining interaction kinetics between drug candidates and membrane protein targets, where the membrane proteins are either in native cellular environment or isolated and stabilized with nanodisc.

Role: PI

NIH R21 1R21DA033839-01 04/01/2012 - 03/31/2015

Title: Plasmonic Mapping of Ion Channel Activities in Single Cells

Description: develops an optical method to measure electrical conductance, making it possible to map ion channel opening and closing activities noninvasively with high spatial and temporal resolution.
Role: Co-Investigator (PI: NJ Tao)

Piper Bridge Award (Virginia Piper Foundation), 07/01/2014-06/30/2015

Title: Measure Protein Interaction at Scale
Description: Measure protein interaction kinetics using Electrochemically Enhanced Surface Plasmon Resonance Imaging (EC-SPRi) and Nucleic Acid-Programmable Protein Array (NAPPA)
Role: Co-Investigator (PI: Mitch Magee)

NIH R21 RR026235 (R21GM103396) 05/15/2010-02/28/2013

Title: A Multi-functional Optical Impedance Microscope for Live Cell Imaging
Description: To develop a new label-free microscopy that can capture sub-micron resolution impedance images of live cells optically, and can obtain surface plasmon resonance, optical and fluorescence microscopy images simultaneously.
Role: PI

Contract # W81XWH-05-C-0128 (DOD), 05/20/05 – 11/30/09

Title: 3D Scaffold and Stem Cell-Based Bioengineered Skin for Treatment of Cutaneous Vesicant Injury
Description: Develop 3D scaffold and stem cell-based bioengineered skin for treatment of cutaneous vesicant injury.
Role: Substitute PI, (Original PI: Wei Chen)

Contract # W81XWH-05-C-0101 (DOD), 02/01/05 – 03/03/08

Title: Nanoparticle Self-Lighting Photodynamic Therapy for Ovarian Cancer Treatment
Description: Design and fabricate nanoparticle self-lighting photodynamic therapy for ovarian cancer treatment
Role: Substitute PI (Original PI: Wei Chen)

Contract # W81XWH-06-C-0038 (DOD), 12/01/05 – 12/30/06

Title: Rapid Cell-based Toxicity Sensor Using Integrated Micro Ring-resonators as Signal Transducer
Description: Develop a rapid cell-based toxicity sensor using integrated microring resonators as signal transducer.
Role: PI

Contract # W81XWH-04-C-0139 (DARPA), 10/01/05 – 5/31/06

Title: Accelerated Vaccine Creation and Testing
Description: Develop artificial human immune system for accelerated vaccine creation and testing, including development of 3D tissue construct and in-situ optical sensing technology to monitor tissue growth.
Role: Technical lead

Contract # 6302 and #6443 (OCAST), 07/01/03 – 9/30/05

Title: AR 03(2)-068, Development of Artificial Tissue Constructs
Description: This project aims toward the design of a rigid, porous ex vivo cell scaffold that mimics the structure of bone marrow by using nanomaterials. This scaffold will be used to support stem cell expansion and differentiation.
Role: PI

Contract # DE-FG02-04ER84022 (DOE), 07/13/04 – 04/12/05

Title: Surface Plasmon Resonance Sensor for Radionuclides
Description: Develop a portable sensor based on surface plasmon resonance spectroscopy and anodic stripping voltammetry to detect radionuclides and other analytes of interest for environmental monitoring, industrial chemical detection, biomedical, and homeland security applications.
Role: PI

Contract # DAMD17-02-1-0702 (DARPA), 10/01/02 – 3/31/04

Title: 3D Tissue Constructs by Sequential Layering for Ex-vivo Immune System
Description: Develop inverted colloidal scaffolds for 3D cell and tissue culture for the construction of artificial human immune system.
Role on Project: Technical lead

Contract # DMI-0214696 (NSF), 07/01/2002 – 12/31/2002

Title: Trace Metal Ion Sensor based on High Resolution Surface Plasmon Resonance and Anodic Stripping Voltammetry

Description: Develop a highly sensitive sensor based on surface plasmon resonance spectroscopy and anodic stripping voltammetry to detect trace metal ions of interest for environmental monitoring, industrial chemical detection, biomedical, and homeland security applications.

Role: PI

Invited talks

29. **Shaopeng Wang**, Measure Small Molecule Binding Kinetics by Charge-Sensitive Plasmonic Nano-Oscillators, 248th ECS Meeting, Symposium M3: Plasmon and Nanophotonics for Photo-(electro)chemical Reactions, Sensing, and Medical Therapy, October 12-16, 2025, Chicago, USA.
28. **Shaopeng Wang**, Measuring Small-Molecule Binding Kinetics to GPCRs via Plasmonic Nano-Oscillators, Cambridge Health Institute's 20th Annual GPCR-Based Drug Discovery, September 24-25, 2025, Boston, MA.

27. **Shaopeng Wang**, Plasmonic and Evanescent Scattering Microscopy for Label-free Imaging of Single Proteins, Gordon Research Conference: Label-free Single Molecule Sensing, June 8-13, 2025, Stonehill College, Easton, MA.
26. **Shaopeng Wang**, Optical imaging-based biosensors with AI-assisted data processing, Power of Big Data and AI in Biomedicine, Biodesign Fusion 2025, Arizona State University, Tempe AZ.
25. **Shaopeng Wang**, Optical imaging-based detection of molecular and cellular activities, The 1st Mayo Clinic/ASU Biodesign Center for Bioelectronics and Biosensors Retreat, Nov 21, 2024, Mayo Clinic Arizona, Phoenix, AZ.
24. Xiaoyan Zhou, Chao Chen, **Shaopeng Wang**, Label-free Single Molecule Immunoassay for point of care detection of protein biomarkers in whole blood, Invited talk, 2024 IEEE Healthcare Innovations and Point of Care Technologies (HI-POCT), Sep 19-20, 2024, Tucson, AZ.
23. **Shaopeng Wang**, Label-free functional imaging of nanoscale single entities, 20th Anniversary Symposium, Center for Bioelectronics and Biosensors, Biodesign Institute, Arizona State University, March 6th, 2024.
22. **S. Wang,** "Plasmonic scattering microscopy for label-free imaging of molecular and cellular activity", 4th Symposium in Stem Cell Biology and Regenerative Medicine, Arizona State University, Tempe, AZ, USA, Feb 9th, 2024.
21. **Shaopeng Wang**, Evanescent scattering microscopy for label-free characterization of single proteins, Invited talk, Roger M. Leblanc Symposium of Molecular and Nano Sciences, 2023 American Chemical Society Southeastern Regional Meeting, Oct 25, 2023, Durham, NC.
20. **S. Wang**, "Label-free functional optical imaging of single entity", Invited faculty chalk talk, Biodesign Institute, Arizona State University, Tempe, AZ, USA, Aug 28th, 2023.
19. **S. Wang**, "Label-free Functional Optical Imaging of Molecular and Cellular Activities", Invited seminar presentation, Department of Biomedical Engineering and Chemical Engineering, University of Texas at San Antonio and University of Texas Health Science Center at San Antonio, Feb 10th, 2023.
18. **S. Wang**, "Label-free Functional Optical Imaging of Molecular and Cellular Activities", Invited virtual seminar presentation, Frontier in Biomedical Engineering, BME Global Summer Workshop., Zhejiang University, July 20th, 2022.
17. **S. Wang**, "Optical Imaging of Single-protein Size, Charge, Mobility and Binding", Invited virtual seminar presentation, Lonza Biologics Inc., July 12th, 2022.
16. **S. Wang**, "Label-free Functional Optical Imaging of Molecular and Cellular Activities", Invited seminar presentation, Department of Pharmacology and Molecular Sciences, School of Medicine, Johns Hopkins University, January 5th, 2022.
15. **S. Wang**, "Multi-functional Optical Microscopy for Biomedical Applications", Invited seminar presentation, School of Biological and Health System Engineering, Arizona State University, January 28th, 2021.
14. **S. Wang**, "Multi-functional Surface Plasmon Resonance Imaging, Applications in Chemistry and Biology", Invited seminar presentation, Department of Chemistry, University of Miami, September 25, 2020.
13. **S. Wang**, "Are neurons bilingual?", invited talk, Faculty Chalk Talk, Biodesign Institute, Arizona State University, Tempe, AZ, Oct 29, 2018.
12. **S. Wang**, "Label-free Quantification of Small Molecule Binding Kinetics", invited talk, Sino-ASU Biodesign Symposium, Arizona State University, Tempe, AZ, Jul 23, 2018.
11. **S. Wang**, "Imaging-Based Detection Technologies for Biomedical Applications", invited talk, Advancing Biophysics, Biosensors and Biomimetics, A symposium to honor Dr. Stuart Lindsay, Arizona State University, Tempe, AZ, Oct 14, 2016.
10. **S. Wang** and NJ Tao, "Detecting Small Molecule-Membrane Protein Binding Kinetics", Keynote Speech on Sensors, 229th Electrochemistry Society (ECS) meeting, San Diego, CA, May 31, 2016.
9. **S. Wang**, "Imaging-based tracking of single bacterial cells toward culture-free antimicrobial susceptibility test", invited talk, FUSION 2016: Biodesign Scientific Retreat, Carefree, Arizona, April 1st, 2016. https://biodesign.asu.edu/fusion-2016

8. **S. Wang**, "Plasmonic Imaging of Chemical and Biological Targets", invited talk, Institute of Chemistry, Chinese Academy of Sciences, Beijing, China, Dec 23, 2014.
7. **S. Wang**, "Development of an Ultra-Fast and Ultra-Sensitive Plasmonic Imaging System", invited talk, Moore Imaging Conference, Gordon and Betty Moore Foundation, Sausalito, California, Dec 4-6, 2014.
6. **S. Wang**, C. MacGriff, X. Shan, W. Wang and NJ Tao, "IDBR: Plasmonic-based Electrochemical Impedance Microscopy for Studying Molecular Binding and Cellular Processes", invited talk, NSF IDBR PI workshop, Arlington, VA, May 1-2, 2014.
5. W. Wang, **S. Wang**, and N. Tao, Electrochemical Impedance Microscopy: A Label-free Technique for Monitoring Individual Cells and Intracellular Processes, *American Physics Society 2012 March Meeting*, Invited Oral Session: High Content Biophysical Data for Dynamic Studies in Cancer, Boston, Massachusetts, Feb. 29, 2012.
4. N. J. Tao and **S. Wang**, Plasmonic-based Electrochemical Impedance Microscopy (P-EIM) for Label-free Cell Based Assay and Small Molecule Detections, invited talk by Dr. Han Xu, Amgen Inc., Thousand Oaks, CA, Nov. 09, 2011.
3. **S. Wang**, Novel Applications of Objective-based Surface Plasmon Resonance Microscopy, invited talk by Dr. Honda Wang, presented at Changchun institute of Applied Chemistry, Chinese Academy of Sciences, Changchun, China, April 29, 2011.
2. N.J. Tao, K. Foley, **S. Wang**, X. Shan, Surface Impedance Microscopy for Biomedical Applications, oral presentation, *The 215th Electrochemical Society Meeting*, San Francisco, California, May 27, 2009
1. **S. Wang**, Development of Optical Sensors for Chemical and Biological Targets, invited oral presentation, *2006 Florida Award Symposium, Florida Annual Meeting and Exposition*, Orlando, Florida, May 12, 2006.

Conference Presentations

40. Jiapei Jiang, Shaopeng Wang, Label-free real-time post-stimulation cellular activity monitoring via Plasmonic Scattering Microscopy, Oral presentation, ACS Fall 2023 National Meeting, San Francisco, CA, USA, Aug 15, 2023.
39. Hao Liu, Xinyu Zhou, Jiapei Jiang, Zijian Wan, Hao Yan, Petr Sulc and **Shaopeng Wang**, Label-free Real-time Tracking of the DNA Self-assembly Dynamics using Evanescent Scattering Microscopy, 20th Annual Conference on Foundations of Nanoscience 2023, April 24-27, 2023, Snowbird, UT.
38. **S. Wang**, "A Virion-Display Oscillator Array and Detection Platform for Quantification of Transmembrane Protein Binding Kinetics", invited oral presentation, 23th Annual Innovative Molecular Analysis Technologies Principal Investigators Meeting, National Cancer Institute, National Institute of Health, Nov 30 – Dec 2, 2022, at University of Kansas, Lawrence, Kansas, USA.
37. Z. Wan, G. Ma, E. Johansen, P. Desai, H. Zhu, **S. Wang*,** "A Virion-Display Oscillator Array and Detection Platform for Quantification of Transmembrane Protein Binding Kinetics", Poster presentation, 22th Annual Innovative Molecular Analysis Technologies Principal Investigators Meeting, Dec 8-10, 2021, online.
36. **S. Wang**, "Measure Single Protein Size and Binding Kinetics with Plasmonic Scattering Microscopy", Invited online oral presentation, Symposium on the Frontiers of Surface Plasmon Resonance Imaging Technology and Applications", Oct 29-30, 2021, Nanjing, China.
35. P. Zhang, G. Ma, Z. Wan, N. Tao, **S. Wang***, Invited oral presentation #M02-1643, "Measure Single Protein Size and Binding Kinetics with Plasmonic Scattering Imaging", Symposium: M02: Biosensors and Nanoscale Measurements: A Symposium in Honor of Professors Nongjian Tao and Stuart Lindsay, 240th ECS Online Meeting (October 10-14, 2021)
34. Z. Wan, G. Ma, E. Johansen, P. Desai, H. Zhu, **S. Wang*,** "A Virion-Display Oscillator Array and Detection Platform for Quantification of Transmembrane Protein Binding Kinetics", Poster presentation, 21th Annual Innovative Molecular Analysis Technologies Principal Investigators Meeting, Dec 2-4, 2020, online.

6. N.J Tao, **S. Wang**, H Yu, Antibiotic susceptibility testing with large-volume light scattering imaging and deep learning video microscopy, US patent 11,834,696, 12/05/2023.
5. N.J Tao, **S. Wang**, Integrated Microarray Printing and Detection System for Molecular Binding Analysis, US Patent 10,823,728, Issue date: 11/03/2020.
4. N.J. Tao, H. Yu, X. Shan, **S. Wang**, Plasmonic Imaging and Detection of Single DNA Molecules, US patent #10,408,757. Issue date: 09/10/2019.
3. **S. Wang**, A. Ramachandran, E. T. Knobbe, F. G. Johnson, B. E. Little, and D. W. Goad, Integrated Optical Resonator Device for Measuring Chemical and Biological Analyte Concentrations, US Patent 7796262 B1, issue date: 09/14/2010.
2. W. Chen, S. Westcott, J. Zhang, and **S. Wang**, Energy-Transfer Nanocomposite Materials and Methods of Making the Same, US patent 7538329, issue date: 05/26/2009.
1. N. A. Kotov and **S. Wang**, 3D Tissue Constructs on the Basis of Colloidal Crystals Surface Modified by Sequential Layering, US patent 7,534,610, issue date: 05/19/2009.

Patent applications

40. **Shaopeng Wang**, Xinyu Zhou, Systems and methods for large language model(LLM)-autonomous development of deep learning models for quantitative microscopy without machine learning expertise, provisional US patent applications, 64/022,957, 03/31/2026.
39. **Shaopeng Wang**, Shelley Haydel, Jiapei Jiang, Shuang Zhou, Methods and related aspects for antibiotic susceptibility testing, provisional US patent application, 63/903,236, 10/22/2025
38. **Shaopeng Wang**, Brandyn Braswell, Jiapei Jiang, Shelley Haydel, Methods and related aspects for antibiotic susceptibility testing, provisional US patent application, 63/710,702, 10/23/2024; full US patent application, 19/366,715, 10/23/2025.
37. **Shaopeng Wang**, Xinyu Zhou, Ryan Porter, Methods and related aspects for producing quantitative cell generated force maps, provisional US patent application, 63/697,688, 9/23/2024.
36. **Shaopeng Wang**, Xiaoyan Zhou, Systems and methods for detecting single-molecule binding kinetics, provisional US patent application, 63/685,012, 8/20/2024.
35 Shelley Haydel, **Shaopeng Wang**, Jiapei Jiang, Yannik Haller, Rapid tuberculosis and mycobacteria phenotypic drug susceptibility testing with scattering imaging and particle tracking, provisional US patent application, 63/663,062, 6/21/2024.
34. **Shaopeng Wang**, Shuo-Hui Cao, Affinity encoded oscillator arrays, methods, and related aspects for measuring molecular binding kinetics, provisional US patent application, 63/649,551, 5/20/2024.
33. **Shaopeng Wang**, Xiaoyan Zhou, Methods and related aspects for performing label-free single-molecule immunoassays, provisional US patent application, 63/602,087, 11/22/2023.
32. **Shaopeng Wang**, C. Chen, Methods and related aspects for detecting and quantifying amounts of N-terminal prohormone B-type natriuretic peptide in whole blood samples, provisional US patent application, 63/600,159, 11/17/2023. US patent application, 18/949,000, 11/15/2024. US patent publication: US20250164509A1, 05/22/2025.
31. **Shaopeng Wang**, Nanxi Yu, Chao Chen, Xinyu Zhou, Januario E. Castro, Eider F. Moreno-Cortes, Methods and related aspects for detecting and quantifying chimeric antigen receptor T cells in samples, provisional US patent application, 63/528,298, 07/21/2023. PCT international application number 18/778,278, 07/19/2024.
30. Hao Yan, Yang Xu, **Shaopeng Wang**, Zijian Wan, Liangxiao Chen, DNA nanostructure mass-tag amplified, affinity assisted surface plasmon resonance detection and identification of circular RNA, provisional US patent application, 63/458,050, 04/07,2023.
29. **Shaopeng Wang**, G. Ma, X. Zhou, Methods and related aspects for determining binding kinetics of ligands, provisional US patent application, 63/388,034, 07/11/2022; US patent application, 18/349.650, 7/10/2023.

28. **Shaopeng Wang**, R. Wang, P. Zhang, Rapid regulation of local temperature with wide-field plasmonic thermal microscopy, provisional US patent application, 63/354,890, 06/23/2022; US patent application, 18/212,460, 6/21/2023.
27. **Shaopeng Wang**, P. Zhang, Methods and related aspects for analyzing exosomes, provisional US patent application, 63/352,929, 06/16/2022; US patent application, 18/204,735, 6/1/2023.
26. **Shaopeng Wang**, G. Ma, Methods and related aspects for detecting unlabeled biomolecules, provisional US patent application, 63/345,962, 06/03/2022.
25. **Shaopeng Wang**, Z. Wan, H. Zhu, Virion oscillator microarrays, methods, and related aspects for determining binding kinetics of ligands, provisional US patent application, 63/321,465, 03/18/2022, US patent application 18/185,808, 09/21/2023.
24. **Shaopeng Wang**, Y. Zhao, G. Ma, Methods and related aspects for molecular tracking and analysis, provisional US patent application, 63/319,208, 03/11/2022.
23. **Shaopeng Wang**, F. Zhang, Label-free Quantification of Cell Surface Membrane Protein Binding Kinetics in Biological Systems, provisional US patent application, 63/315,155, 03/01/2022.
22. **Shaopeng Wang**, P. Zhang, Methods, Systems, and Computer Readable Media for Single-Objective Evanescent Scattering Microscopy for Imaging Single Proteins and Binding Kinetics, provisional US patent application, 63/306473, 02/03/2022.
21. **Shaopeng Wang**, G. Ma, Methods and related aspects of tracking molecular interactions, provisional US patent application, 63/289,195, 12/14/2021. Supported by NIH grants: R33CA235294 and R44GM126720
20. **Shaopeng Wang**, F. Zhang, Methods and related aspects of rapid microbial detection using intrinsic feature tracking, US patent application 18/055,003, 11/14/2022, provisional US patent application, 63/280,406, 11/17/2021.
19. N. Stephanopoulos, Y. Xu, **Shaopeng Wang**, H. Yan, High sensitivity DNA linked immunosorbent signal amplification assay (DLSA) for detection of infectious SARS-Cov-2 virus and variants, provisional US patent application, 63/257,838, 10/20/2021.
18. **Shaopeng Wang**, P. Zhang, Evanescent scattering imaging of single molecules, provisional US patent application, 63/249,388, 09/28/2021.
17. **Shaopeng Wang**, R. Liang, Charge-sensitive optical detection of binding kinetics between phage displayed peptide ligands and protein targets, provisional US patent application, 63/261,005, 09/08/2021.
16. **Shaopeng Wang**, F. Zhang, Rapid antimicrobial susceptibility testing by video-based object scattering intensity detection, provisional US patent application, 63/144,207, 02/01/2021
15. **Shaopeng Wang**, P Zhang, Single molecule imaging, provisional US patent application, 63/137,611, 01/14/2021
14. **Shaopeng Wang**, G. Ma, R. Liang, Critical angle reflection imaging for quantification of molecular interactions, provisional US patent application 63/122.687, 12/08/2020.
13. N.J. Tao, **Shaopeng Wang**, R Liang, Small molecule detection in normal ionic strength buffers, provisional US patent application 63/051,667, 07/14/2020.
12. N.J. Tao, F. Zhang, **Shaopeng Wang**, Digital antimicrobial susceptibility testing, US Patent App. 18/002,438, 2023/7/20, provisional US patent application 63/043,713, 06/24/2020.
11. N.J Tao, **Shaopeng Wang**, P. Zhang, Single molecule imaging, provisional US patent application 62/975,473, 02/12/2020
10. N.J Tao, **Shaopeng Wang**, H Yu, Antibiotic susceptibility testing with large-volume light scattering imaging and deep learning video microscopy, provisional US patent application 62/482,099, 04/05/2017. Patent application publication Number: WO/2018/187548, Publication Date: 11.10.2018, International Application No.: PCT/US2018/026223, International Filing Date: 05.04.2018. US Patent Application 16/500,370, US20210130868A1, publication date: 2021-05-06
9. NJ Tao, **Shaopeng Wang**, Integrated Microarray Printing and Detection System for Molecular Binding Analysis, US Patent Application 15/204738, 07/07/2016; provisional US patent application 62/190109, 07/08/2015.
8. N.J. Tao, H. Yu, X. Shan, **Shaopeng Wang**, Plasmonic Imaging and Detection of Single DNA Molecules, International Application No. PCT/US2015/010018, 01/02/2015; US patent application No.15/038629, 05/23/2016; provisional US patent application 61/923477, 01/03/2014.

7. **Shaopeng Wang**, A. Ramachandran, E. T. Knobbe, F. G. Johnson, B. E. Little, and D. W. Goad, Integrated optical Resonator Device for Measuring Chemical and Biological Analyte Concentrations, provisional US patent application 11/809,867, 05/31/2007.
6. W. Chen, S. Westcott, J. Zhang, and **Shaopeng Wang**, Energy-Transfer Nanocomposite Materials and Methods of Making the Same, filed 10/28/2005, US Patent Application No. 11/262,470. Continuation: Application 2010/176343 A1, published 7/20/2010.
5. N. A. Kotov and **Shaopeng Wang**, 3D Tissue Constructs on the Basis of Colloidal Crystals Surface Modified by Sequential Layering, U.S. patent application Ser. No. 10/460,059.
4. W. Chen, **Shaopeng Wang**, and S. Westcott, Nanoparticle Thermometry and Pressure Sensors, United States Patent Application #2007/0189359 A1.
3. **Shaopeng Wang**, B. Strecker, C. Cumming, N. A. Kotov, and S. L. Westcott, High-throughput 3D Cell Culture Robot and Methods of Making Same, filed 2/7/2005, US Patent Application Serial No. 11/052,637.
2. **Shaopeng Wang**, N. A. Kotov, and J. Zhang, Three Dimensional Micro-Environments and Methods of Making and Using Same, U. S. patent application #2007/0003595A1, 2007.
1. **Shaopeng Wang**, P. Ja, A. Ramachandran, B. Strecker, Monitor living cells by optical resonator, filed 7/12/2007, U.S. patent application.

Mentoring and Supervision Experiences

- Graduate faculty advisor (endorsed to chair) for Biological Design, Electrical Engineering, Biomedical Engineering, Physics, Chemistry and Biochemistry Ph.D. programs.
- Research Collaborator and Advisor of the National Science Foundation Research Traineeship at Arizona State University (https://nrt.asu.edu/team/): Human Centered Design and Manufacturing of Medical Devices and Implants.

Current Postdocs (total: 4)

1. Dr. Rui Jia (female), PhD in chemistry, 2023.10 – present.
2. Dr. Jiapei Jiang, PhD in Biomedical Engineering, 2023.12 – present.
3. Dr. Xinyu Zhou, PhD in Biomedical Engineering, 2024.05 – present.
4. Dr. Mukesh Thapa, PhD in chemistry, 2024.11 – present.
5. Dr. Tony (Qiuzhe) Xie, PhD in Electrical Engineering, 2026.03 – present.

Current Ph.D. Students: Chair/Co-Chair (total: 7)

1. Ryan Porter (ECE), 2019 fall – present, ***Chair***
2. Andy Chieng (Chemistry), 2020 fall – present, ***Chair***
3. Mohammad Javad Haji Najafi (ECE) 2022 summer – present, ***Chair***
4. Brandyn Braswell (Biological Design), 2023 spring – present, ***Chair***
5. Yuanxin Zhang (Chemistry), 2024 fall – present, ***Chair***
6. Monica Venkataramana (Female, BME), Fall 2025 – present, ***Chair***
7. Timothy (Haibin) Liang (ECE), Fall 2025 – present, ***Chair***

Current Ph.D. Students: Thesis Committee Member (total: 8)

1. Ciara Eades (Female, BME, 2024 -), Advisor: Prof. Heather Clark
2. Nikita Srinivasan (Female, BME, 2025 -), Advisor: Prof. Heather Clark
3. Maziyar Kalatehmohammadi (ECE, 2024 -), Advisor: Prof. Chao Wang
4. Abdulla AL Mamun (ECE, 2024 -), Advisor: Prof. Chao Wang
5. Shaun Wootten (BME, 2024 -), Advisor: Prof. Mehdi Nikkhah
6. Nimapreet Kaur Bamrah (BME, 2025 -), Advisor: Prof. Chao Wang
7. Timothy Williams (Microbiology, Fall 2025-), Advisor: Prof. Shelley Haydel
8. Sin-Pei(Kira) Wu (Biological Design, Spring 2026–), Advisor: Prof. Mark Wang

Current Master Students Supervised (total: 1)

1. Sydney Kwan (Female, BME), 4+1 2026 fall-.

Current Master Students: Thesis or Applied Project Committee Member (total: 1)

1. Shah Chintan (BME, 2025-), Master's Thesis, Committee Member, Advisor: Prof. Jordan Yaron

Current Undergraduate Students (total: 2)

1. Nidhi Nag (Female, BME), Class of 2027, Spring 2024 – present. Undergraduate researcher.
2. Ryan Luong (BME), Class of 2029, Spring 2026 – present. Undergraduate researcher.

Previous Research Staffs (total: 8)

1. Dr. Wei Wang, Assistant Research Professor, (2013.01 – 2013.12); Current position: Professor, School of Chemistry and Chemical Engineering, Nanjing University
2. Dr. Hui Yu, Assistant Research Scientist (2012-2017); Current position: Associate Professor, School of Biomedical Engineering, Shanghai Jiao Tong University
3. Dr. Xiaonan Shan, Assistant Research Professor (2014-2016); Current position: Assistant Professor, Dept. of Electrical & Computer Engineering, University of Houston
4. Dr. Yuheng Chen, Assistant Research Scientist (2016-2017); Current position: Researcher, NEC Laboratories America, Inc.
5. Dr. Wenwen Jing, Female, Assistant Research Scientist (Female, 2018-2020); Current position: Assistant Professor, Fudan University Medical School.
6. Dr. Fenni Zhang, Female, Assistant Research Professor (Female, 2020.06 – 2021.02); Current position: Assistant Professor, Dept. of Biomedical Engineering, Zhejiang University, China.
7. Timothy (Haibin) Liang, research technician, (2021.07 – 2023.06); Master student of Computer Science (MCS), Ira A. Fulton Schools of Engineering, ASU, current position: Senior Data Analyst, ASM America.
8. Dr. Yang Xu, Assistant Research Professor, (Female, 2022.10.01 – 2026.07) 50/50 shared with Prof. Hao Yan.

Previous Postdocs (total: 18)

1. Dr. Wei Wang (2009.11 – 2012.12); Current position: Professor, School of Chemistry and Chemical Engineering, Nanjing University, China
2. Dr. Xianwei Liu (2012-2016); Current position: Professor, Department of Chemistry, University of Science and Technology of China, China
3. Dr. Xiaonan Shan (2011-2014); Current position: Associate Professor, Department of Electrical & Computer Engineering, University of Houston
4. Dr. Yixian Wang (Female, 2013-2016); Current position: Associate Professor, Department of Chemistry & Biochemistry, California State University at Los Angles
5. Dr. Wei Dong (2015-2016); Current position: Researcher, Hamamatsu, Japan
6. Dr. Yunze Yang (2016-2019); Current position: Assistant Professor of Clinical, Medical Physicist, University of Miami Miller School of Medicine, Miami, FL, USA.
7. Dr. Wenwen Jing (Female, 2016.05 - 2020.06); Current position: Assistant Investigator, Fudan University Medical School, China.
8. Dr. Tianyu Xue (2018.10-2019.12); Current position: Professor, Department of material physics and chemistry, Yanshan University, China.
9. Dr. Fenni Zhang (Female, 2018.09 – 2020.05); Current position: Professor, Department of Biomedical Engineering, Zhejiang University, China.
10. Dr. Rui Wang (2020. 03 – 2021.06); Current position: Professor, Department of Biomedical Engineering, Southeast University, China
11. Dr. Guangzhong Ma (2019.10 – 2022.08); Current position: Assistant Professor, Department of Chemistry, Zhejiang University, China
12. Dr. Pengfei Zhang (2018.10 – 2022.09); Current position: Faculty, Beijing National Laboratory for Molecular Sciences.
13. Dr. Jayeeta Kolay (Female, 2021.08 – 2023.05); Current position: postdoc at NIH
14. Dr. Xingwen Chen (2022.08 – 2023.06) co-mentored with Prof. Xiao Wang; Current position: postdoc at University of Huston.
15. Dr. Zijian Wan, PhD in electrical engineering, 2023.08 – 2023.11. Current position: Senior Electrical Engineer at Bruker, San Jose, CA, USA.
16. Dr. Nanxi Yu (female), PhD in chemistry, 2023.12 – 2024.07; Current position: Process Engineer in Applied Materials.

17. Dr. Chao Chen, PhD in Biomedical Engineering, 2024.05 – 2024.07; Current position: Clinical research manager, Shenzhen New Industry Biomedical Engineering Co, Ltd.
18. Dr. Xiaoyan Zhou, PhD in Electrical Engineering, 2024.08 – 2025.03, Current position: Industrial Optical Engineer.

Graduated Ph.D. Students Chaired and Co-chaired (total: 8)

1. Guangzhong Ma (Chemistry, 2013-2019), ***Co-Chair*** (with Prof. NJ Tao); Current position: Assistant Professor at Dept. of Chemistry, Zhejiang University.
2. Runli Liang (Female, ECE, 2016-2021), ***Co-Chair and substitute advisor*** (Original Advisor: Prof. NJ Tao); Current position: Executive director, Zhongke Yitong Technology Ltd.
3. Zijian Wan (ECE), 2018.08 – 2023.08, ***Chair***; Current position: Senior Electrical Engineer at Bruker, San Jose, CA, USA.
4. Jiapei Jiang (BME), 2019.08 – 2023.12, ***Chair***; Current position: postdoc.
5. Nanxi Yu (Female, Chemistry) 2019.08 – 2023.12 ***Chair***; ***primary advisor,*** Current position: Process Engineer in Applied Materials
6. Chao Chen (BME), 2018 fall – 2024.05, ***Chair,*** Current position: Clinical research manager, Shenzhen New Industry Biomedical Engineering Co, Ltd.
7. Xinyu Zhou (BME), 2019 fall – 2024.05, ***Chair,*** Current position: postdoc in the lab.
8. Xiaoyan Zhou (ECE), 2021 fall – 2024.08, ***Chair***, Current position: Industrial Optical Engineer.

Graduated Ph.D. Students Co-supervised and as Committee Member (total: 8)

1. Christopher McGriff (ECE, 2008 - 2013), (Chair: Prof. NJ Tao); Thesis title: Small Molecule Detection by Surface Plasmon Resonance: Improvements in Sensitivity and Kinetic Measurement. Current position: Senior Director of Strategic Planning, Inflammatix Inc.
2. Yan Guan (Female, ECE, 2010-2015), (Chair: Prof. NJ Tao); current position: Optical Sensing Hardware Engineer at Apple, Cupertino, California
3. Yunze Yang (ECE, 2010-2016), (Chair: Prof. NJ Tao); Current position: Assistant Professor of Clinical, Medical Physicist, University of Miami Miller School of Medicine, Miami, FL, USA.
4. Karan Syal (Biological design, 2011-2017), (Chair: Prof. NJ Tao); Thesis title: Rapid antimicrobial susceptibility testing based on Bacterial motion tracking. Current position: Founder and Chief Technology Officer at cAST Technologies, San Francisco
5. Yan Wang (ECE, 2013.08 - 2018.07); (Chair: Prof. NJ Tao); Current position: Industrial Engineer
6. Fenni Zhang (Female, ECE, 2013.08 – 2018.07), (Chair: Prof. NJ Tao); Current position: Assistant Professor at Dept. of Biomedical Engineering, Zhejiang University.
7. Rafael Iriya (ECE, 2014 – 2020), Advisor Chair: Prof. NJ Tao,; Current position: principal research scientist at Fetch Rewards.
8. Manni Mo (Female, Chemistry, 2016 - 2020), (Advisor: Prof. NJ Tao); Current position: Packaging R&D Engineer at Intel Corporation, Intel, Arizona.

Graduated Ph.D. Students Co-supervised (total: 2)

1. Kyle Foley (ECE, 2008-2010), Chair: Prof. NJ Tao; current position: Packaging R&D Engineer at Intel Corporation, Intel, Arizona
2. Xiaonan Shan (EE, 2008-2011), Chair: Prof. NJ Tao; Current position: Assistant Professor, Department of Electrical & Computer Engineering, University of Houston

Graduated Ph.D. Students as Committee Members (total: 9)

1. Brianne Petritis (Female, Biological design, 2009-2018), (Advisor: Prof. Joshua LaBaer); Current position: Global Marketing Coordinator, Olink Protemics.
2. Yuan Wang (Physics, 2013-2021), (Advisor: Prof. Quan Qing)
3. MD Ashif Ikbal (ECE, 2017-2022), (Advisor: Prof. Chao Wang)
4. Sanjana Mukherjee (Female, PHY, 2022-2024), (Advisor: Prof. Quan Qing)
5. Sina Mirjalili (ECE, 2022-2025), Advisor: Prof. Chao Wang
6. Joshua Eger (BME, 2019-2025), Advisor: Prof. Jennifer Blain Christen
7. Vi Nguyen (Female, BME, 2022 - 2025), Advisor: Prof. Jennifer Blain Christen
8. Joshua Rousseau (BME, 2023 - 2025), Advisor: Prof. Mark Wong
9. Tingyun (Sally) Wang (Female, Biological design, 2024-2025), Advisor: Prof. Mark Wang

Graduated Master Students Chaired (8)

1. Yunlei Zhao (ECE, 2019-2021); Current position: PhD student at UIUC.
2. Zachary Fisher (BME, 2022 Spring), MS applied project. Current position: Applications and Service Engineer, Vicivision America, Scottsdale, Arizona, USA.
3. Praveena Elanghovan (BME), Class of 2023, current position: PhD student at the University of Buffalo.
4. Sai Akhila Simhadri (female, BME, 2023 Fall), MS applied project. Current position: Biochemist, Eurofins PSS Insourcing Solutions, Indiana, USA.
5. Monica Venkataramana (Female, BME), Master's thesis 2023 fall – 2025 Spring, Currently a PhD student.
6. Holland Gailey (BME), Applied Project, 2025 Spring.
7. Somdev Halder (BME) 2025 summer – 2026 Spring, Master thesis
8. Thao Tran (BME) 2026 Spring, Master Applied Project.

Graduated Master's Thesis Students Co-supervised (total: 5)

1. Yen-chun Chao (Female, Chemistry, 2011-2013); Current position: Engineer at TSMC (Committee member)
2. Ashley Hunt (Female, Chemistry, 2016-2018), 3 co-authored papers; Current position: Scientist at Biosensing Instrument Inc. (Tempe AZ)
3. Landon Denham (CHE), Class of 2023. Master Thesis. Committee member. Advisor: Prof. Erica Forzani.
4. Matthew McFadden (BME), Class of 2024. Master Thesis. Committee member. Advisor: Prof. Mark Hayes
5. Ritvik Satyanarayanan (BME, 2024), Master's Thesis, Committee Member, Advisor: Prof. Mehdi Nikkahah

Graduated Master Students Co-Supervised (total: 8)

1. Urmez Patel (ECE, 2009 – 2010), Current position: Graphics Hardware Engineer at Intel
2. Feng Xiao (Chemistry, 2014-2017), Current position: Software Development Engineer at AWS
3. Jia Zeng (Female, Bioinformatics, 2015-2017), Current position: Senior Clinical Informatics Scientist at Caris Life Sciences
4. Nikhilkumar Kheni (Mechanical Engineer, 2018-2019) Current position: Manufacturing Engineer at MAAX Spas Industries Corp
5. Ahmed Al-Sultani (BME), Master Applied Project Committee Member, Graduated Dec 2022. Advisor: Prof Jennifer Blain Christen.
6. Emanuel Salayandia (CHE), Master Applied Project Committee Member, Graduated Dec 2022. Advisor: Prof. Erica Forzani.
7. Sanket Patel (CHE), Class of 2023. Master Applied Project. Advisor: Prof. Erica Forzani.
8. Hemal Kiritbhai Vasoya (CHE)Class of 2023. Master Applied Project. Advisor: Prof. Erica Forzani

Graduated Undergraduate Students Supervised (total: 38)

1. Joseph Peterman (student worker, Biology, 2019-2020)
2. Isabelle Hernandaz (Female, 2021.08 – 2022.05, student worker on rapid antimicrobial susceptibility test project, major in medical microbiology, school of life science
3. Sonja Brett (Female, BME), Natalie Stevens (Female, BME), Emma Peterson (Female, BME), Sean Tucker (BME), and Tor Christian Tjorhom (BME), (2021.09-2022.05) BME capstone project team #23, Development of a portable microscope for point of care digital immunoassay for rapid troponin detection; ***Faculty Mentor***
4. Shaun Victor, Barrett Honors college major in Biomedical Engineering, 2021.09 – 2022.05, **secondary advisor** (primary advisor Prof. Erica Forzani).
5. Christina Aridi (Female), Alyssa LaBine (Female), Aayush Shah, McKenna Strambi (Female) (2022-2023 BME Capstone team #5), Project title: "Addressing Racial Bias in Pulse Oximetry", ***Faculty Mentor***
6. Mariah McNally, Tea McCormack, Jessica Camacho, Alexandra Liaos, Margie Vollkommer (2022-2023 BME Capstone team #19, all female), Project title: "at-home NST machine", ***Faculty Mentor***
7. Aayushi Parikh (Female, Biochemistry), undergraduate student worker, 2022.08 – 2022.12.
8. Amanda Tsui, (Female, BME) undergraduate student researcher, 2022.11- 2023.05.
9. Asher Hendricks (CHE), Honors thesis, 2022.09 – 2023.05, **secondary advisor** (primary advisor Prof. Erica Forzani).
10. Andrew Grillo, Ashle Burns (Female), Daniel Kasen, Nicholas Hawkinson (2023-2024 BME Capstone team #24), Project title: "Cystic Fibrosis", ***Faculty Mentor***

11. Neha Shakir, Tina Ton, Anika Attaluri, Anushka Limaye, Ava Clair Lariego (all Female), (2024-2025 BME Capstone team #6), Project title: "Tele-Vision: Portable mobile device adapter for imaging anterior & posterior eye segments", ***Faculty Mentor***
12. Anvitha Doddipalli (Female, BME), Class of 2025, Summer 2024 – Spring 2025 Undergraduate Honor Thesis.
13. Aditya Sharma (CS), 2025 summer -, 2025 SURI awardee
14. Vivan Mall (BME), Class of 2026, Summer 2023 – Summer 2024. Undergraduate researcher.
15. Rayan Mostofa (BME), Class of 2026, Fall 2024 – Spring 2026 Undergraduate researcher, 2025 FURI awardee.
16. Elijah Don (BME), Class of 2026, Fall 2024 –Fall 2025 Undergraduate researcher, 2025 SURI awardee.
17. Sydney Kwan (Female, BME), Class of 2026, Fall 2024 – Spring 2025, Undergraduate researcher.
18. Casey Isabelle, Sydney Kwan, Nicki Lalime, Sam Soto-Urias (all Female), (2025-2026 BME Capstone team #24), Project title: "Tele-Vision: advancing portable ophthalmic imaging technology", ***Faculty Mentor***

Previous Supervised High School Student Researchers (total: 3)

1. Simon Shen (2014 - 2016), Current position: Ph.D. student at Harvard University.
2. Peter Gao (2015), Current position: Registered Patent Attorney at Bryan Cave Leighton Paisner LLP, Phoenix, Arizona, USA.
3. Jessica Zhang (2018 - 2020), Current position: Technical Program Manager at Google, after graduating from Stanford University.

Teaching

- Lectured on biosensor-related topics in the following classes:
    - ASU Ira A. Fulton Schools of Engineering Global Outreach and Extended Education: Kazan State Technological University/ Institute of Additional Vocational Training; "Advanced Chemistry, Nanotechnology, Research Management and Innovations" Workshop (2010)
    - BDE 701/598 Fundamentals of Biological Design (2009, 2010, 2011)
    - EEE 598 Personal Sensors for Mobile Health Applications (2012, 2016, 2019)
    - BME 598 Biosensing Technologies (2019)
- Taught general, physical, and organic chemistry labs for 4 years as a graduate teaching assistant during Ph.D. study at the Department of Chemistry, University of Miami.
- 2022 Spring: BME 340 Thermodynamics for BME (60 students)
- 2022 Spring: BME 598 Biosensing Technologies (26 students)
- 2022 Fall: BME 423 Biomedical Instrumentation Laboratory (52 students)
- 2022 Fall: BME ASU 101 (2 sections, total 28 students)
- 2023 Spring: BME 340 Thermodynamics for BME (60 students)
- 2023 Fall: BME 598 Biosensing Technologies (28 students)
- 2024 Spring: BME 340 Thermodynamics for BME (58 students)
- 2024 Fall: BME 598 Biosensing Technologies (7 students)
- 2025 Spring: BME 340 Thermodynamics for BME (44 students)
- 2025 Spring: BME 591 Bioengineering Seminar (92 students)
- 2025 Fall: BME 591 Bioengineering Seminar (78 students)
- 2025 Fall: BME 494 Biosensing Technologies (8 students)
- 2025 Fall: BME 598 Biosensing Technologies (16 students)
- 2025.05- now: curriculum development workgroup member for Applied Medical Engineering 1
