TRAINING RESEARCH INTERESTS

Area #1 – Developing AI tools for use in education, training, and integrated healthcare settings
Focused on developing, implementing, and evaluating chatbots that guide learners through the exploration and research of health-related topics and develop technological skills used in healthcare settings.

Area #2 – Improving training and workforce development efforts that support integrated healthcare
Focused on developing targeted training programs that assess and provide learners with personalized learning pathways targeting knowledge and skills gaps. Exploring key factors associated with effective and efficient training programs designed to support learner development of team-based core competencies.

Area #3 – Supporting learner development of effective evidence-based treatment strategies within family systems
Focused on applying a family systems framework to conceptualize, plan, implement, and evaluate integrated treatment approaches that support sustainable patient and family health behavior change efforts.
