TEACHING

Arizona State University (2015-present)

CDE 598/498 – Latinx Children, Youth, and Families

Description: This is a 3-credit hour, designed for graduate and advanced undergraduate students,

introduction course to Latinx children, youth, and families. In an in-person, small-class-size format (i.e., ≤ 10). The goal of the class is to foster a critical understanding of how culture, policies, and activism shapes and is shaped by our Latinx families in the United States, influencing our identity, development, and wellbeing.

Fall 2023: 6 students

FAS 370 – Family Ethnic and Cultural Diversity

Description: This is a 3-credit hour, undergraduate-level, introduction course to family ethnic and cultural diversity. In an in-person, medium-to large-class-size format (i.e., ≤ 80), students learn the main issues related to justice, equity, diversity, and inclusion, and the ways in which they can be translated into civic engagement and policy. The class consists of lectures and in-class exercises. We review basic elements to understand the history of racism and oppression in the United States, informed by research and conceptual models, such as critical race theory and intersectionality. Students are evaluated based on thought papers, attendance, and exams.

Spring 2024: 51 students
Fall 2023: 49 students
Spring 2023: 64 students
Spring 2022: 74 students
Fall 2021: 93 students
Fall 2020: 78 students
Fall 2019: 35 students
Spring 2019: 52 students
Fall 2018 1: 37 students
Fall 2018 2: 31 students
Spring 2018: 31 students
Fall 2017: 34 students
Spring 2016: 31 students

FAS 598 – Theory and Methods in Diversity and Inclusion Science

Description: This is a 3-credit hour, graduate-level, advanced course on theory and methods on diversity and inclusion science. In an in-person, small-class-size format (i.e., ≤ 20), students learn advanced conceptual and methodological tools related to structural racism and other systems of oppression, including critical race theory and intersectionality. The class consists of discussions of readings that the students selected based on an active learning and student participatory approach to the co-construction of the syllabus. Students are evaluated based on thought papers for each class, and a final original paper on theory, research, methods, and/or interventions to address these issues.

Fall 2021: 7 students

FAS 598 - Introduction to Systematic Reviews and Meta-Analysis

Description: This is a 3-credit hour, graduate-level, introduction course to systematic reviews and meta-analysis (SR&MA). In an in-person, small-class-size format (i.e., ≤ 20), students learn basic conceptual, methodological, logistical, and statistical tools to conduct a SR&MA. The goal of the class is for students to be able to complete and pre-register a protocol following PRISMA guidelines. The class consists of class discussions one day, and hands-on lab exercises focused on specific tasks related to writing the protocol. We review basic elements to understand the history, reasons, possibilities, and limitations of SR&MA. Next, we discuss the importance of the research question, as well as inclusion and exclusion criteria. Students learn search strategies, creating a codebook, data extraction and coding, effect size coding and conversion, model selection, and testing heterogeneity, moderation, and publication bias. Students are evaluated based on thought and lab papers, and submission of a protocol.

Fall 2019: 19 students

FAS 598 – Culture and Biology Interplay

Description: This is a 3-credit hour, graduate-level, introduction course to culture and biology interplay. In an in-person, small-class-size format (i.e., ≤ 20), students learn basic theory and research on culture and biology interplay. The class consists of class discussions of landmark and recent readings. The goal of the class is for students to be able to understand the history, concepts, findings, and limitations of this field. We focus on the foundations of theory and research on culture and biology interplay, and focus on specific areas including animal culture, cultural neuroscience, cultural neurobiology, and cultural genomics. Students are evaluated based on thought papers, and submission of a final paper.
