#### Steven Eugene Saul, Ph.D.

Assistant Professor Arizona State University 6073 S. Backus Mall, Mail Code 2780 Mesa, AZ 85212, USA 1.786.423.7625 Email: steven.saul@asu.edu

Education: University of Miami/RSMAS, Miami, Florida Ph.D. Degree in Marine Biology and Fisheries (December 2012)

# University of Miami/RSMAS, Miami, Florida

Masters of Arts Degree in Marine Affairs and Policy (May 2006)

University of Richmond, Richmond, Virginia Bachelor of Science Degree in Environmental Studies and Music (May 2004)

# Professional Arizona State University (March 2016 – Present)

Experience: College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus

# Mesa, Arizona

Assistant Professor

Supervise and mentor a team of students (graduate and undergraduate) and post-doctoral scientists at both Arizona State University and Oxford University. Instruct undergraduate and graduate courses in ecology, fish population dynamics, and ethical resource management. Our applied research portfolio includes using agent-based models, statistical analyses, and field data collection to understanding coupled natural-human dynamics in fisheries, coral reefs, and other ecological systems using a systems-based approach. Scientific findings from research activities support policy development for resource management purposes. Collaborate with stakeholders in governmental agencies, not-for-profit organizations, and fishing communities in the United States, Indonesia, Kingdom of Tonga, and the member countries that fish for tuna across the Eastern Pacific Ocean.

# Environmental Defense Fund (January 2022 – September 2023)

San Francisco, California

## Complex Systems Scientist

Develop and advocate science-based, economically sound, fair, and equitable environmental solutions through building ecosystem resilience, optimizing cobenefits across complex systems, identifying strategies to build resilience to climate change across the socio-economic and food security aspects of various fisheries, and analyzing management interventions and strategies suited to fisheries in a changing climate.

# Gulf of Mexico Fisheries Management Council, Science and Statistical Committee, Ecosystem Committee Voting Member (August 2021 – Present)

## Tampa, Florida

Appointed Voting Member

Peer review scientific fisheries stock assessments and related scientific analyses. Recommend revisions as needed. Develop and provide policy recommendations for consideration based on the scientific assessments being considered. Policy recommendations are considered by the Gulf Council and either rejected or ultimately adapted into law by the Gulf Council and National Marine Fisheries Service. Establish terms of reference for upcoming scientific evaluations of fish populations.

## Marine Stewardship Council (January 2023 – Present)

London, United Kingdom

Peer Reviewer, Fishery Stock Assessments

Provide independent technical review of fishery stock assessments from fisheries around the world in support of Marine Stewardship Council certification of commercial fishing operations. This allows catch from such operations to be marketed as sustainable and sold for a higher price.

# Nova Southeastern University (August 2013 – February 2016) National Coral Reef Institute, Oceanographic Campus

# Ft. Lauderdale, Florida

Senior Research Scientist

Supervised and mentored a team of students (graduate and undergraduate) and post-doctoral scientists in the field collection and statistical analysis of remotely sensed and ground-truthed data from remote coral reefs in tropical small island developing nations to develop two-meter resolution maps of coral reef habitat. Participated in month long research expeditions aboard the M/Y Golden Shadow in collaboration with the Living Oceans Foundation and local scientists and managers in each host nation. Collected socioeconomic data from fishing communities in small island developing countries. Assisted with logistical planning and execution of ship and small boat navigation and mooring operations on each expedition.

## Key Marine Consulting, Inc. (October 2010 – Present)

Miami, Florida

Founding Partner

Evaluation, modeling and mapping of ecosystem services for non-governmental organizations, for profit companies, and government agencies. Projects include: 1) Chief scientist for the POSEIDON project (Ocean Conservancy, The Nature Conservancy, Oxford University, and in-country partners) developing agent-based modeling software to manage fisheries by representing the interactions of marine ecosystem and human behavior dynamics. Implemented with Indonesian federal government for reef fish management, Interamerican Tropical Tuna Commission to manage tuna populations in the Pacific Ocean, and for management in the U.S. West Coast groundfish fishery. 2) Development and implementation of a marine fisheries educational program for Biscayne and Everglades National Parks for first time offenders of fishing regulations and the public. 3) Evaluation and modeling of ecosystem services for Cementos Argos company and Ecoral organization, Bogota, Colombia. 4) Development of agent-based model for Sea of Cortez corvina fishery for Environmental Defense Fund.

# National Marine Fisheries Service (January 2011 – August 2013)

# Miami, Florida

# Research Fisheries Biologist

Led and participated in population assessments for economically important coral reef fish populations in the Gulf of Mexico, South Atlantic and Caribbean regions using statistical modeling and data analysis techniques. Presented scientific results and management advice to regional scientific and management bodies. Conducted research to improve stock assessment methodologies and procedures. Collaborated with managers, scientists, fishermen, and other stakeholders to research and assess fish population dynamics.

# Biscayne National Park (May 2007 - 2009)

Homestead, Florida

Fisheries Biological Technician

Developed and implemented marine fisheries educational program for first time offenders of fishing regulations and the South Florida fishing community. Assisted with development and maintenance of coral nursery.

# Cooperative Institute for Marine and Atmospheric Studies, University of Miami (May 2004 to July 2007)

Miami, Florida

Fisheries Research Assistant

Interned with the National Marine Fisheries Service's Southeast Fisheries Science Center. Assisted with the preparation and analysis of fishery data for Gulf of Mexico and U.S. Caribbean stock assessments. Recovered paper records from the U.S. Caribbean local government and developed a relational database with these records which is currently used to assess and manage fish populations in the region.

# Grants Awarded: External While at ASU

Gordon and Betty Moore Foundation and The Ocean Conservancy. Project Title: The POSEIDON model for ocean fisheries. Amount Funded: \$556,344. Project Dates: January 1, 2021 to February 28, 2024. Role: PI.

The Oceans Conservancy. January 2018 to December 2020. Pioneering a new era of fishery management: the POSEIDON model of ocean fisheries. \$231,206 (Note: value in Sponsored Activity Report not up-to-date). Role: PI, Percent Effort: 100%.

Gulf of Mexico Research Initiative. January 2016 through December 2018. Avoiding Surprises: understanding the impact of the Deepwater Horizon oil spill on the decision making behaviors of fishers and how this affects the assessment and management of commercially important fish species in the Gulf of Mexico using an agent-based model. \$967,226. Role: PI. Percent Effort: 100%.

NOAA Fisheries, Southeast Fisheries Science Center (via Cooperative Institute of Marine and Atmospheric Science, University of Miami). Fantasy and folly in fisheriesdependent length sampling: a review of Trip Interview Program (TIP) sampling protocols and its effect on stock assessment. August 2016 through July 2020. \$137,122. Role: Co-PI, Percent Effort: 100%

# Internal While at ASU

College of Integrative Sciences and Arts Summer Research Award. \$5,000. Role: PI, Percent Effort: 100%. (Summers 2017, 2018, 2019, and 2020).

## Prior to ASU

NOAA Coral Reef Conservation Grant (awarded to Key Marine Consulting, Inc.). January 2014 to June 2015. The Catch and Release Program: Achieving Fisheries Management Through Education in South Florida. \$30,000. Role: PI, Percent Effort: 100%.

NOAA Coral Reef Conservation Grant (awarded to Key Marine Consulting, Inc.). July 2012 to December 2013. The Catch and Release Program: Achieving Fisheries Management Through Education. \$21,000. Role: PI, Percent Effort: 100%.

Joint NMFS/Sea Grant Population Dynamics Fellowship. June 2008 to May 2011. The Development and Use of an Agent-based Model to Evaluate the Effect of Effort Redistribution Due to Fleet Heterogeneity and Policy Implementation on Estimating a Standardized Catch per Unit Effort Index of Abundance. \$115,500. Role: PI, Percent Effort: 100%.

NOAA Coral Reef Conservation Grant (awarded to Key Marine Consulting, Inc.). October 2010 to March 2012. Biscayne National Park Fisheries Education Class. \$26,000. Role: PI, Percent Effort: 100%.

National Park Foundation Impact Grant (awarded to Biscayne National Park). February 2011. Biscayne and Everglades National Parks Fisheries Education Class. \$10,000. Role: PI, Percent Effort: 100%.

International Light Tackle Tournament Association Scholarship. October 2009. The Development and Use of an Agent-based Model to Evaluate the Effect of Effort Redistribution Due to Fleet Heterogeneity and Policy Implementation on Estimating a Standardized Catch per Unit Effort Index of Abundance. \$2,500. Role: PI, Percent Effort: 100%.

Gulf and Caribbean Fisheries Institute: Best Student Presentation Award. November 2005. A categorical approach to modeling catch at age for various sectors of the gray triggerfish (Balistes apriscus) fishery in the Gulf of Mexico. \$1,500. Role: PI, Percent Effort: 100%.

#### Mentees Under <u>Postdoctoral Scholars</u> Advisement

Dr. Katyana Vert-Pre Kirk. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Primary Advisor. (2018 – present)

Dr. Brian Powers. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Primary Advisor. (2016 – 2019)

Dr. Ernesto Carrella. Oxford University, Oxford Martin School, Oxford, England, United Kingdom. Role: Co-Advisor. (2016 – 2022)

Dr. Jens Madsen. Oxford University, Oxford Martin School, Oxford, England, United Kingdom. Role: Co-Advisor. (2017 – 2020)

Dr. Nicolas Payette. Oxford University, Oxford Martin School, Oxford, England, United Kingdom. Role: Co-Advisor. (2017 – 2022)

# Ph.D. Students

Julia Phelps. School of Mathematical and Statistical Sciences, Tempe Campus, Arizona State University. Role: Co-Advisor. (2021 – present).

Brooke Anderson. New College, West Campus, Arizona State University. Role: Co-Advisor. (2021 – present).

Kayla Burgher. Environmental Life Sciences, School of Life Sciences, Tempe Campus, Arizona State University. Role: Committee Member (2022 – present)

Rani Ekawaty. University of Bogor, Republic of Indonesia. Role: Co-Advisor (2021 – present).

Diding Efendi. University of Bogor, Republic of Indonesia. Role: Co-Advisor (2019 – 2021, Graduated 2021).

Kyle Strongin. School of Sustainability, Tempe Campus, Arizona State University. Role: Co-Advisor. (2017 – 2021, Graduated Spring 2021)

Xuetao Lu. School of Mathematical and Statistical Sciences, Tempe Campus, Arizona State University. Role: Co-Advisor. (2017 – 2020, Graduated Fall 2020)

Elle Wibisono. Coastal Institute, University of Rhode Island. Role: External committee advisor/fisheries stock assessment mentorship (2019 – 2020, Graduated Fall 2020)

## Master's Students

Emily Keister. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Primary Advisor. (2019 – 2022, Graduated Spring 2022)

Megan Woodyard. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Primary Advisor. (Graduated 2019)

Jessica Ruiz. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Primary Advisor. (Graduated 2019)

Sidney Riddle. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Committee Member. (Graduated 2018)

Jessica Dwyer. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Committee Member. (Graduated 2021)

Cameron Boehme. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Committee Member. (Graduated 2019)

# Undergraduate Students

Mia Ennis. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Undergraduate Research Advisor and Senior Barrett Thesis Advisor. (2020-2022). Graduated, B.S. in 2022.

Quiarrah Mapp. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Undergraduate Research Advisor and Senior Barrett Thesis Advisor. (2020-2022). Graduated, B.S. in 2022.

Chyna Rendon. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Undergraduate Research Committee Member. (2020-2021). Graduated, B.S. in 2021.

Nadia Taylor. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Undergraduate Research Advisor and Senior Barrett Thesis Advisor. (2019-2020). Graduated, B.S. in 2020.

Alicia Hinterlong. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Undergraduate Research Advisor. (2016-2018). Graduated, B.S. in 2018.

Carol Meza. College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Undergraduate Research Advisor. (2016-2018). Graduated, B.S. in Fall 2020.

Dallin Montierth, College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Undergraduate Research Advisor. (2016-2018). Graduated, B.S. in 2018.

Christian Mader, College of Integrative Sciences and Arts, Science and Mathematics Unit, Polytechnic Campus, Arizona State University. Role: Undergraduate Research Advisor. (2016-2018). Graduated, B.S. in 2018.

Teaching	Ecology (ABS 370), Fall 2016, Spring and Fall 2017, Spring and Fall 2018, Spring and Fall 2019, Spring and Fall 2020, Spring and Fall 2021, Spring and Fall 2022. Enrollment between 80 and 120 Students.
	Special Topics (ABS 494): Fish Population Dynamics, Fall 2017 and Fall 2020. <u>New</u> course at Arizona State University.
	Special Topics (ABS 394): Human Rights and Environmental Management, Spring 2021 and Fall 2021, Spring and Fall 2022. <u>New course at Arizona State University</u> .
Service	Guest Editor, Fishes special issue on coral reef fish (2023 to present).
	Topic Editor, Journal Editorial Team, Sustainability (2020 to present).
	Peer Review Journal and Book Reviewer: ICES Journal of Marine Science, Journal of Environmental and Resource Economics, the books Seascape Ecology and Past, Present, and Future: Mediterranean Cold-water Corals.
	Weekly Departmental Research Colloquium Series Coordinator (2017 to 2023)
	Organized special session on modelling: Marine Socio-Ecological Systems Conference: navigating global change in the marine environment. Yokohama, Japan, 25-29 May 2020.
	Organized special session on agent-based modeling: International Institute for Fisheries Economics and Trade Conference, Seattle Washington, July 2018.
	Hiring committees: Spring 2019 (Applied Biology Lecturer Position 12717), Spring 2020 (Quantitative Ecologist Position 15192); Spring 2023 (Pre-Veterinarian and Immunology Position 107117)
	Chair – hiring committee, academic year 2021-2022 (Pre-Vet Position 17056)
	Faculty Meeting Rapporteur (Academic year 2016-2017)
	Collaboration with ASU STEM Preparatory Junior High School After School Lego and Robotics Team to develop fisheries project for Statewide competition (Fall Semester 2016)
Statistical Programming Skills:	R Java SAS MATLAB Stock Synthesis 3 (and other stock assessment software) ArcGIS
Language Skills:	Spanish Fluency, oral, reading, and writing
Affiliations:	American Fisheries Society, International Institute of Fisheries Economics and Trade
Certifications:	PADI Rescue Diver, AAUS, NOAA, NPS Scientific Diver Certifications FAA Private Pilots License

Awards:	Collegewide Researcher of the Year Award, College of Integrative Arts and Sciences, Arizona State University, Academic Year 2019-2020.
Mentee Awards:	Xuetao Lu, Ph.D. Student in School of Mathematical and Statistical Sciences, 2018 Dennis Young Graduate and Early Scholar Statistics Award.
	Jessica Ruiz, Master's Student, Tony Gonzales Travel Scholarship to attend the AGIC Geospatial Education and Training.
	Xuetao Lu, Ph.D. Student in School of Mathematical and Statistical Sciences, Travel Scholarship to attend the 2018 Gulf of Mexico Oil Spill and Ecosystem Science Conference. New Orleans, Louisiana, February 5-8.
	Jessica Ruiz, Master's Student, Travel Scholarship to attend the 2018 Gulf of Mexico Oil Spill and Ecosystem Science Conference. New Orleans, Louisiana, February 5-8.
	Jessica Ruiz, Master's Student, 2018 Academic Year Outstanding Undergraduate Research Award, Science and Mathematics Unit, Polytechnic Campus, ASU.
Invited Presentations:	Saul, S. 2023. Incorporating Socioeconomic Data into Stock Assessments and its Effect on Status Criteria Determination. Gulf of Mexico Fisheries Management Council Science and Statistical Committee Meeting, Tampa, Florida, U.S. 7 – 9 March, 2023.
	*Saul, S. and K. Vert-Pre. 2019. Are Agent-Based Approaches the Future of Fishery Management? The Poseidon Model & ABMs as Assessment Tools. Center for the Advancement of Population Assessment Methodology, Next Generation Stock Assessment Model Workshop. University of Wellington, Wellington, New Zealand, 4-8 November 2019.
	*Saul, S. 2018. Agent-based approaches to modeling fisheries management. Centre of Excellence Fisheries Modelling Workshop. Jointly sponsored by The Ocean Conservancy, The Nature Conservancy, and The Indonesian Ministry of Fisheries, Bali, Indonesia, July 30-31.
Presentations: (oral unless otherwise stated as a poster; † indicates my student or postdoc is presenter; * indicates while at ASU)	*Saul, S. 2021. Evaluating the status of Indonesian deepwater snapper and grouper fishery stocks using a model ensemble approach. World Fisheries Congress. Adelaide, Australia, September 20-24.
	*Saul, S. 2019. Progress towards an agent-based model that explores the effects of the Deepwater Horizon Oil Spill on fish and fishers in the Gulf of Mexico. Gulf of Mexico Oil Spill and Ecosystem Science Conference. New Orleans, Louisiana, February 4-8.
	*Lu, X. and <b>S. Saul.</b> 2019. A Bayesian hierarchical model for spatial analysis of reef habitat data of the Gulf of Mexico. Gulf of Mexico Oil Spill and Ecosystem Science Conference. New Orleans, Louisiana, February 4-8.
	*Saul, S. 2018. Sustaining ocean life: understanding the behavior of fishers for resource management. Science and Mathematics Colloquium Series at the

**\*Saul, S.** 2018. Sustaining ocean life: understanding the behavior of fishers for resource management. Science and Mathematics Colloquium Series at the Polytechnic Campus, August 29, 2018.

\*Saul, S. 2018. Quantifying and Comparing Fisher Decision-making Strategies Before and After the Deepwater Horizon Oil Spill. International Institute for Fisheries Economics and Trade, Biannual Meeting. Seattle, Washington, July 17-20.

\*Saul, S. 2018. Questionnaires, discrete choice models, and agent-based models of fisher behavior: what can we learn from each? International Institute for Fisheries Economics and Trade, Biannual Meeting. Seattle, Washington, July 17-20.

\*<sup>*t*</sup>Powers, B. and **S. Saul**. 2018. Simulating fish migration trails in the Gulf of Mexico using a biased random path in continuous space. Gulf of Mexico Oil Spill and Ecosystem Science Conference. New Orleans, Louisiana, February 5-8.

<sup>\*</sup><sup>*t*</sup>Lu, X., and **S. Saul**. 2018. Statistical methods for spatial analysis of reef fish abundance of the Gulf of Mexico. Gulf of Mexico Oil Spill and Ecosystem Science Conference. New Orleans, Louisiana, February 5-8.
