

Curriculum Vitae

H. John DeLugt

Email: hjdelugt@asu.edu - Office: 480.727.1004

Professional Profile

Seasoned Air Traffic Controller with 25 years of experience at a Level 12 En Route facility. Excellent communication skills and ability to work well with others. Track record of maintaining the highest level of competence, safety and professionalism while working in a challenging, highly competitive workplace with a variety of individuals with diverse backgrounds. August, 2016 began working at Arizona State University as a lecturer specializing in en route air traffic control.

Skills

Operational Monitoring
Active Learning
Instruction and Preparing Training Reports

Sound Judgment and Decision Making
Complex Problem Solving
Active Listening and Speaking

Professional Experience

En Route Air Traffic Control Specialist, ZLA (Los Angeles Air Route Traffic Control Center) Aug. 1990 to Sept. 2015.
Lecturer, Air Traffic Management Program, Arizona State University, Polytechnic Campus, August 2016 to present

- Responsible for the safe, orderly and expeditious flow of air traffic into and out of assigned sectors using radar and computer equipment.
- Coordinated, precisely and timely, critical information with adjacent sectors and facilities.
- Responded to pilot requests for altitude and routing amendments.
- Informed pilots of nearby aircraft or potentially hazardous conditions, especially weather.
- Trained developmental controllers on Radar Associate and Radar positions.
- As a Controller in Charge, was responsible for all sectors in the operational area.
- As an instructor/lecturer overhauled and reworked the curricula for two radar courses; created a non-radar course to prepare students for the FAA Academy.
- Preparing students for a career in air traffic control with an emphasis on the en route discipline.

| Air Traffic Control Screen, Oklahoma City, OK | 1990 |
| Bachelor of Arts, Political Science, Arizona State University | 1989 |

While employed by the FAA, there were monthly requirements to complete Electronic Learning Management System (eLMS) and Computer Based Instruction (CBI) courses on safety, weather, seldom used procedures and various other subjects relating to and the performance of being an Air Traffic Controller. Since retirement I have been actively keeping up with the latest changes in air traffic control via web based research as well as being in constant communication with current controllers and managers thereby keeping students updated in the ever changing field of ATC.
