## CURRICULUM VITAE

Dr. James Sulikowski (602-543-1214), School of Mathematical and Natural Sciences, New College of Interdisciplinary Arts and Sciences, Arizona State University's West Campus, Cell:603-767-1106,  
Email:james.sulikowski@asu.edu, Website: <https://sites.google.com/view/sulikowskilab/home>  
Social Media: @sulikowskilab

---

## ACADEMIC TRAINING

Ph.D. Zoology, 2003	University of New Hampshire, NH
M.S. Physiology, 1998	DePaul University, IL
M.S. Marine Biology, 1996	Nova Southeastern University, FL
B.S. Biology, 1991	Denison University, OH

---

## PROFESSIONAL HISTORY

2022-Present	Professor and Director, Interdisciplinary Blue Science Laboratory, New College of Interdisciplinary Arts & Sciences, Arizona State University
2019-2022	Professor and Associate Director, New College of Interdisciplinary Arts & Sciences, School of Mathematical & Natural Sciences, Arizona State University
2014-2019	Professor, University of New England
2010-2014	Associate Professor, University of New England
2006-2010	Assistant Professor, University of New England
2004-present	Adjunct Faculty, University of New Hampshire Animal and Nutritional Sciences
2004-2006	Senior Research Scientist, Florida Program for Shark Research, University of Florida
2003-2004	Postdoctoral Fellow, University of New Hampshire

---

## ADMINISTRATIVE EXPERIENCE

**Current:** Elevated to Director of the Interdisciplinary Blue Science Laboratory (IBSL): In this position my role is to provide collaborative and visionary leadership to nurture and grow newly formed *Marine Science* initiatives across Arizona State University (ASU) and beyond. This includes strategic vision for developing new research integrated undergraduate and graduate education curriculum and programs, developing large inter and intra multidisciplinary collaborations with diverse individuals and groups, funding sources, and expanding partnerships within the community, and professional agencies.

**Past:** Associate Director of the School of Mathematical & Natural Sciences. In this position I worked with the Director to provide administrative vision, leadership, and management for the School. In this position, I was responsible for managing over 2 department chairs and over 100 faculty and staff.

Served as chair and vice chair of the College of Arts and Sciences Faculty Assembly at the University of New England. Among other duties, in this position I served as liaison between the faculty and upper administration concerning faculty governance issues. I served as Chair of the Institutional Animal Care and Use Committee and the Academic Curriculum Committee. In these capacities, I had oversight of all activities involving research conducted on vertebrate animals at the University of New England as well as evaluating the undergraduate curriculum its effectiveness and plans for its improvement. In addition, I typically manage a staff of 10-20 individuals including technicians and students and an externally funded budget that has averaged approximately USD \$600k annually since 2008. My team interacts with fishermen, fishery managers, fishery scientists, academic scientists, and NGOs.

---

## CURRENT UNIVERSITY SERVICE

**Arizona State University:** New College Undergraduate Retention Committee, Grant Approval Administrator, Curriculum Management Administrator, Course Assessment Administrator, Radiation Safety Committee.

---

## EXTERNAL SERVICE

**Current:** IUCN (World Conservation Union): Appointed to the Species Survival Commission Shark Specialist Group. Advisory Board for Atlantic Shark Institute, Advisory Board Atlantic Shark Institute, South East Data, Assessment, and Review (SEDAR).

**Past:** May 2004-2019; Skate advisor for the New England Fishery Management Council, 2001-2019. Gulf of Maine Council on the Marine Environment, September 2007-2019; Board of Directors, Saco River Salmon Club, January 2008-2019; Board of Directors, American Elasmobranch Society, 2008-2013; Spiny dogfish advisor for the Mid Atlantic Fishery Management council, 2008-2019; New England Fisheries Management Council Science and Statistical Committee (SSC) 2017-2019.

---

## TEACHING EXPERIENCE

2006-Present Biology of Fishes, Fisheries Biology, the Biology of Sharks Skates and Rays, Marine and Estuarine Field Techniques, Fish Ecology, Fisheries Biology, Ecology, and the Physiological Ecology of Fish.

---

## PUBLICATIONS

I have published 84 papers since 2006 (total of 113), averaging ~6 per year. Currently, I have 8 papers in review (not included below). For all publications, undergraduate and graduate student co-authors at the time of publication are listed in bold below.

1. Sherman, R.L., J.A. Sulikowski, and R.E. Spieler. 2000. Similarities and differences in fine gill vasculature among batoid elasmobranchs. *American Zoologist* 40 (6): 1210-1210.

2. Sulikowski, J.A. and L. A. Maginniss. 2001. Effects of environmental dilution on body fluid regulation in the yellow stingray, *Urolophus jamaicensis*. *Comp. Bioch. Phys.* 128(2):223-232.
3. Sulikowski, J.A. 2002. Skates of the Western Gulf of Maine. Skate identification guide. Northeast Consortium and New Hampshire Sea Grant.
4. Sulikowski, J.A. and W.H. Howell. 2003. Body solute regulation in the winter skate, *Leucoraja ocellata*; the effects of reduced salinity environments. *Environ. Bio. Fish.* 66(4): 339-348.
5. Sulikowski, J.A., **M. D. Morin**, **S. H. Suk**, and W. H. Howell. 2003. Age and growth of the winter skate, *Leucoraja ocellata*, in the Gulf of Maine. *Fish Bull.* 101(2):405-413.
6. Sulikowski, J.A. and W.H. Howell. 2003. Ionic and hematological changes in the summer flounder (*Paralichthys dentatus*) associated with their movement from a recirculating system hatchery to an ocean net pen. *J. World. Aqua. Soc.* 34 (3): 387-397.
7. Sulikowski, J.A., P.C. Tsang and W.H. Howell. 2004. Annual changes in steroid hormone concentrations and gonad development in the winter skate, *Leucoraja ocellata*. *Mar. Bio.* 144:845–853.
8. Sulikowski, J.A., **J. Kneebone**, **S. Elzey**, P. Danley, W. H. Howell and P.C.W. Tsang. 2005. Age and growth estimates of the thorny skate, *Amblyraja radiata*, in the Gulf of Maine *Fish Bull.* 3(1):161-168.
9. Sulikowski, J.A., P.C.W. Tsang and W.H. Howell. 2005. Age and size at sexual maturity for the winter skate, *Leucoraja ocellata*, in the western Gulf of Maine based on morphological, histological and steroid hormone analyses. *Environ. Bio. Fish.* 72 (4): 429-441.
10. Sulikowski, J.A., E.A. Fairchild, **N. Rennels** and W.H. Howell. 2005. The effects of tagging and transport stress on juvenile winter flounder, *Pseudopleuronectes americanus*: implications for successful stock enhancement. *J. World. Aqua. Soc.*36(1):148-156.
11. Sulikowski, J.A., **J. Kneebone**, **S. Elzey**, P. Danley, W. H. Howell and P.C.W. Tsang. 2005. The reproductive cycle of the thorny skate, *Amblyraja radiata*, in the Gulf of Maine. *Fish Bull.* 103(3):536-543.
12. Sulikowski, J.A., D. Kulka and **T. Gedamke**. 2005 Smooth skate, *Malacoraja senta*. In: Sharks, rays and chimaeras: the status of the chondrichthyan fishes. Fowler, S.L., M. Camhi, G. Burgess, S. Fordham and J. Musick, eds. IUCN/SSG Shark Specialist Group. IUCN, Gland, Switzerland, and Cambridge, UK. 461 pgs.
13. Sulikowski, J.A., D. Kulka and **T. Gedamke**. 2005. Winter skate, *Leucoraja ocellata*. In: Sharks, rays and chimaeras: the status of the chondrichthyan fishes. Fowler, S.L., M. Camhi,

G. Burgess, S. Fordham and J. Musick, eds. IUCN/SSG Shark Specialist Group. IUCN, Gland, Switzerland, and Cambridge, UK. 461 pgs.

14. Sulikowski, J.A., D. Kulka and **T. Gedamke**. 2005. Little skate, *Leucoraja erinacea*. In: Sharks, rays and chimaeras: the status of the chondrichthyan fishes. Fowler, S.L., M. Camhi, G. Burgess, S. Fordham and J. Musick, eds. IUCN/SSG Shark Specialist Group. IUCN, Gland, Switzerland, and Cambridge, UK. 461 pgs.
15. Sulikowski, J.A., D. Kulka and **T. Gedamke**. 2005. Thorny skate, *Amblyraja radiata*. In: Sharks, rays and chimaeras: the status of the chondrichthyan fishes. Fowler, S.L., M. Camhi, G. Burgess, S. Fordham and J. Musick, eds. IUCN/SSG Shark Specialist Group. IUCN, Gland, Switzerland, and Cambridge, UK. 461 pgs.
16. Sulikowski, J.A., E.A. Fairchild, **N. Rennels** and W.H. Howell. 2006. The effects of transport density on stress in juvenile winter flounder, *Pseudopleuronectes americanus*: implications for successful stock enhancement. J. World. Aqua. Soc. 37 (1): 107-112.
17. Carlson, J.K., J.A. Sulikowski and **I. Baremore**. 2006. Do differences in life history exist for blacktip sharks, *Carcharhinus limbatus*, from the United States south Atlantic Ocean and Gulf of Mexico. Environ. Bio. Fish. 77:279-292.

---

## GRANTS AND FUNDING

Since 2006, my colleagues and I have been awarded ~\$13,500,000 in total research support, of which ~\$6,900,000 has come directly to my Home Institution.

### CURRENT

- 2019-2021 Quantifying and reducing post-release mortality of Scalloped Hammerhead sharks (*Sphyrna lewini*) captured as bycatch in pelagic long-line fisheries. NOAA/NMFS BREP in the amount of \$149,000. CO-PI Neil Hammerschlag U. Miami.
- 2020-2024 The use of novel fishery-independent tagging technology to investigate the movements and stock structure of adult Monkfish (*Lophius americanus*) along the United States East Coast. NOAA/NMFS Monkfish Research Set-Aside Program valued at \$4,209,000 to the fishery, ASU portion \$320,000.
- 2019-2022 Quantifying and reducing post-release mortality of shortfin mako sharks (*Isurus*

*oxyrinchus*) captured as bycatch in pelagic long-line fisheries. NOAA/NMFS BREP in the amount of \$199,000. CO-PI Mike Byrne U. Missouri.

- 2018-2022 Development of a histological protocol for the age determination of monkfish, *Lophius americanus*: NOAA/NMFS Monkfish Research Set-Aside Program valued at \$2,100,00 to the fishery, ASU portion \$166,000.
- 2020-2022 Development of a protocol for the determination of reproductive hormones in the muscle of Lamnid sharks, NOAA/NMFS \$25,000.

#### PAST

- 2017-2019 Evaluating the Condition and Discard Mortality of monkfish Following Capture and Handling in the Sea Scallop Dredge Fishery: Scallop Research Set Aside Program: NOAA/NMFS in the amount of \$1,541,000; CO-PI: Dave Rudders (VIMS).
- 2017-2019 Evaluating the life history and stock structure of yellowfin tuna (*Thunnus albacares*) in the northwest Atlantic Ocean. NOAA/NMFS SK in the amount of \$299,000. CO-PI: Walt Golet (GMRI).
- 2015-2018 Determining the discard mortality rate and best capture-handling methods for Atlantic cod (*Gadus morhua*) captured in the Gulf of Maine commercial lobster industry. NOAA/NMFS BREP in the amount of \$244,000.
- 2016-2018 Quantifying and reducing post-release mortality for Barndoor skates discarded in the commercial gillnet fishery. NOAA/NMFS BREP in the amount of \$199,000.
- 2015-2018 Improving the management of an overfished, data poor species: Investigating the movements and stock structure of thorny skates using novel fishery-independent tagging technology. NOAA/NMFS SK in the amount of \$320,000. CO-PIs: John Mandelman and Jeff Kneebone (NEAQ).
- 2015-2018 Quantifying and reducing post-release mortality for Dusky sharks discarded in the commercial pelagic longline fishery. NOAA/NMFS BREP in the amount of \$249,000. CO-PI: Walt Golet (GMRI).
- 2015-2017 Biological Sampling to Determine Age and Growth of Atlantic Bluefin Tuna in the NW Atlantic III. NOAA/NMFS in the amount of \$220,000. UNE portion \$34,105. CO-PI: Walt Golet (GMRI).
- 2014-2016 Evaluating the Condition and Discard Mortality of Skates Following Capture and Handling in the Sea Scallop Dredge Fishery: Scallop Research Set Aside Program: NOAA/NMFS in the amount of \$1,657,181; UNE portion \$261,000 CO-PI: Dave Rudders (VIMS) and CO-PI John Mandelman (NEAQ).

- 2014-2016 Evaluating the Condition and Discard Mortality of Winter Skate, *Leucoraja ocellata*, Following Capture and Handling in the Sink Gillnet Fishery: NOAA/NMFS Monkfish Research Program in the amount of \$1,700,000.
- 2013-2015 Biological Sampling to Determine Age and Growth of Atlantic Bluefin Tuna in the NW Atlantic II. NOAA/NMFS in the amount of \$220,000. UNE portion \$34,105 CO-PI: Walt Golet (GMRI).
- 2012-2015 Evaluating the Condition and Discard Mortality of Skates Following Capture and Handling in the Sea Scallop Dredge Fishery: Scallop Research Set Aside Program: NOAA/NMFS in the amount of \$1,092,643; UNE portion \$127, 000 CO-PI: Dave Rudders (VIMS) and CO-PI John Mandelman (NEAQ).
- 2013-2014 Biological Sampling to Determine Age and Growth of Atlantic Bluefin Tuna in the NW Atlantic. NOAA/NMFS in the amount of \$220,000. UNE portion \$34,105 CO-PI: Walt Golet (GMRI).
- 2012-2014 Elucidating post-release mortality and "best capture and handling" methods in sublegal Atlantic cod discarded in Gulf of Maine recreational hook fisheries. Bycatch Reduction Program: NOAA/NMFS in the amount of \$260, 159: UNE Portion, \$71,000. CO-PI: John Mandelman (NEAQ).
- 2011-2013 The use of settlement collectors to investigate the early life history of Atlantic wolffish (*Anarhichas lupus*) and Cusk (*Brosme brosme*) in the Gulf of Maine. Funding source: NOAA/NEC development grant in the amount of \$33,847.
- 2011-2013 The development of a non-lethal and non-invasive protocol to study elasmobranch reproduction. Funding Source: Save our Seas Foundation in the amount of \$20,000.
- 2011-2013 A Cooperative Approach to Updating and Investigating Anomalies in Critical Life History Parameters of Two Exploited Shark Species, Blacknose (*Carcharhinus acronotus*) and Finetooth (*Carcharhinus isodon*), in the Northern Gulf of Mexico: Information Essential to Fisheries Management: NOAA/ CRP in the amount of \$130,097; UNE portion \$48, 875. CO-PI Eric Hoffmayer, University of Southern Mississippi.
- 2011-2013 The development of a non-lethal and non-invasive protocol to study elasmobranch reproduction. Funding Source: Save our Seas Foundation in the amount of \$20,000.
- 2011-2012 Menhaden Aerial Survey in the Northern Portion of Their Range. Industry funded (OMEGA Protein) in the amount of \$250,000.
- 2010-2013 Dismissing Dogma II: The Use of Satellite Tags to Examine the Behavior of Spiny Dogfish (*Squalus acanthias*) in Relation to Habitat Use, Depth Preferences and Movement Patterns in the Northwest Atlantic. Funding source: NOAA S & K in the amount of \$100,000. PI.

- 2010-2014 Connectivity and demographic correspondence among sturgeon stocks in Maine (and Beyond). Funding source: NOAA Section 6 in the amount of \$1,319,479. UNE portion \$384,000. Co-PI's: Gail S. Wippelhauser, Maine DMR; Michael T. Kinnison and Gayle B. Zydlewski, UMaine Orono.
- 2010-2013: Temporal aspects of habitat utilization and interspecies competition: defining the ecological impacts of spiny dogfish in structuring the ecosystem dynamics of southern New England. Funding source: Commercial Fisheries Research Foundation in the amount of \$194,000. PI.
- 2009-2013 Dismissing Dogma: The Use of Satellite Tags to Examine the Behavior of Spiny Dogfish (*Squalus acanthias*) in Relation to Habitat Use, Depth Preferences and Movement Patterns in the Northwest Atlantic. Funding source: NOAA S & K in the amount of \$237,000.
- 2008-2009 Habitat Utilization and Biological Characteristics of Atlantic Sturgeon, *Acipenser oxyrinchus oxyrinchus*, in The Saco River Lower Watershed. Funding source: NOAA in the amount of \$49,087.00.
- 2008-2011 The Immediate and Short-Term Post-Release Mortality of Species in the Northwest Atlantic Skate Complex Captured by Gillnet and Otter-Trawl. Co-PI: John Mandelman. Funding source: NOAA S & K in the amount of \$247,000. UNE Portion \$150,000.
- 2008-2009 Spatial and Temporal Variability of the Planktonic Community of Saco Bay: Relationships with the Physical Flow Field. Co-PI: Charles Tilburg. Funding source: Maine Sea Grant in the amount of \$1,800.00.
- 2007-2008 The design, development, and field testing of an innovative circular net pen to be used to asses bycatch mortality of Atlantic cod at sea. Co-PI: John Mandelman. Funding source: The Northeast Consortium in the amount of \$25,000.
- 2006-2008 Field Testing of a novel application to examine habitat use and migration patterns of spiny dogfish (*Squalus acanthias*) in the Western Gulf of Maine. Funding source: The Northeast Consortium in the amount of \$ 23,940.
- 2006-2007 Using New Approaches to Update and Collect Fisheries Specific Data on Age Determinations of the Spiny Dogfish in the Gulf of Maine. Co-PI: Paul Tsang and Dave Koester. Funding Source: New Hampshire in the amount of \$132,399.
- 2005-2006 Tracking the Movements of Bull Sharks in the Gulf of Mexico Using Pop-Up Satellite Archival Transmitters (PSAT Tags). Funding source: Florida Institute of Oceanography in the amount of \$ 40,000.
- 2005-2006 Identification of Ray Migration Patterns in. Funding source: Disney Wildlife Fund in the amount of \$ 18,250.

- 2005-2006 Developing new techniques to age batoid elasmobranchs. Funding source: New Hampshire in the amount of \$5000.
- 2005-2006 Life history changes in an exploited skate species (*Amblyraja radiata*) within the Gulf of Maine: Determining new strategies for their fisheries management Co-PI: Paul Tsang. New Hampshire in the amount of \$75,000.
- 2001-2004 East Consortium- Identification of Life History Parameters for Two Exploited Skate Species (*Amblyraja radiata* and *Malacora senta*) in the Gulf of Maine: Strategies for Fisheries Management. Co-PI: Paul Tsang, and Joe Jurek. Funding source: The Northeast Consortium in the amount of \$200,000.
- 2001-2002 Sea Grant Development Grant-Assessing the population genetics of the Winter Skate, *Leucoraja ocellata*, in the Gulf of Maine. Co-PI: Pat Danley and Hunt Howell Funding source: New Hampshire Sea Grant in the amount of \$5,125.
- 2010-2011 The use of settlement collectors to investigate the post settlement fauna of the Saco Bay Estuary. CAS faculty development grant in the amount of \$2,000.
- 2008-2009 Behavioral Responses of Ichthyoplankton to Rates of Salinity Change: Creating a Predictive Model. Co-PI: Charles Tilburg. Marine Science Center Summer Fellowship in the amount of \$8,500.
- 2008-2009 Identification of the Ichthyoplankton Community in Saco Bay: CAS faculty development grant in the amount of \$2,000.
- 2008-2009 Evaluating the Saco Bay estuary system and its potential use as a nursery ground for inshore macrofaunal species. Co-PI Nathan Furey (undergraduate). Provost's Faculty Grant Program in the amount of \$2,000.
- 2007-2008 Spatial and Temporal Variability of the Planktonic Community of Saco Bay: Relationships with the Physical Flow Field. Co-PI: Charles Tilburg. Marine Science Center Summer Fellowship in the amount of \$8,000.
- 2006-2007 Developing new approaches to quantify discard mortality rates of Atlantic cod, *Gadus morhua*, in the Gulf of Maine multispecies trawl fishery. University of New England Mini Grant in the amount of \$1,700.00.
- 2002-2003 University of New Hampshire Dissertation Fellowship in the amount of \$ 11,750
- 2002-2004 Preliminary examination of possible life history changes in an exploited skate species (*Amblyraja radiata*) in the Gulf of Maine. Co-PI: Paul Tsang. Funding source: Hubbard Endowment in the amount of \$8,000.
- 1999-2002 Seasonal gonadal activity, reproductive status and length at maturity in the Winter

Skate, *Leucoraja ocellata*. Co-PI: Hunt Howell. Funding source: Center for Marine Biology in the amount of \$1,000.00.

1999-2002 Assessing, Life History and Ecology of the Winter Skate, *Leucoraja Ocellata*. Co-PI: Hunt Howell. Funding source: Center for Marine Biology in the amount of \$2,000.

1999-2002 Assessing the Reproduction, Life History and Ecology of the Winter Skate, *Leucoraja Ocellata*. Co-PI: Hunt Howell. Funding source: Hubbard Endowment in the amount of \$8,000.

---

## INVITED LECTURES, PRESENTATIONS & SOCIAL MEDIA

3 organized symposium.

50+ invited lectures on subjects including fishery management, shark biology, and conservation; given to academic, government and industry audiences.

170+ conference presentations in the USA, Canada, Mexico, and Europe including the American Elasmobranch Society, the American Fisheries Society, International White Shark Symposium, International Council for the Exploration of the Sea (details are given provided on the ensuing pages).

200+ interviews on mass media including the BBC, National Geographic, the ABC Ocean Mysteries Series, The today show, Fox News, and shark week.

Social media accounts collectively average 800,000 views per year.

### **Regional, National, and International Scientific Presentations: (Undergraduate and graduate co-authors are listed in bold):**

1. **Anderson B**, Kaloczi J, Einig A, Holden C, Donaldson L, Malone H, Natanson L, Viducic K, Passerotti M, Bowlby H, Dodd J, Sulikowski J. Quantifying reproductive hormones in skeletal muscle tissue of porbeagles (*Lamna nasus*) demonstrates the value of biological sample sharing. Joint Meeting of Ichthyologists and Herpetologists. Spokane, WA. July 2022. Oral Presentation
2. **Anderson, B.**, Hammerschal, N., Gallagher, A., Natanson, N., Bowlby, H., Dodd, J., and Sulikowski, J. 2021. Preliminary insights into the movements of pregnant Porbeagles (*Lamna nasus*) in the Northwest Atlantic. Joint Meeting of Ichthyologists and Herpetologists. Phoenix, AZ. Oral Presentation
3. **Anderson, B.**, Hammerschal, N., Gallagher, A., Natanson, N., Bowlby, H., Dodd, J., and Sulikowski, J. 2021. Preliminary insights into the movements of pregnant Porbeagles (*Lamna nasus*) in the Northwest Atlantic. Joint Meeting of Ichthyologists and Herpetologists. Phoenix, AZ. Oral Presentation.

4. **Schwieterman, G.D.; Crear, D.P.; Anderson, B.N.;** Lavoie, D.R.; Sulikowski, J.A.; Bushnell, P.G.; Brill, R.W. 2020. Warmth, and OA, and Hypoxia, Oh My! Interactions of simulated climate change on the metabolism of coastal species. Ocean Sciences Meeting. San Diego CA. Poster presentation.
5. **Anderson, B.,** Natanson, L., and Sulikowski, J. Preliminary insight into the resiliency of juvenile porbeagle sharks to capture and handling techniques. 2019 Joint Meeting of Ichthyologists and Herpetologists. Snowbird, UT. Oral Presentation.
6. **Verkamp H.J,** Skomal ,G., Winton. M., and Sulikowski, J.A. 2019. First observations of reproductive hormone concentrations in white shark (*Carcharodon carcharias*) skeletal muscle tissue. Joint Meeting of Ichthyologists and Herpetologists. Snowbird, UT.
7. Kieffer, M., Trefry, I., Sulikowski, J., Hylton, S., Wippelhauser, G., Ingram, E., and Zydlewski, G. 2019. Use of the Piscataqua River System by shortnose and Atlantic sturgeons. Connecticut River Atlantic Salmon Commission 2019 Research Forum, Hadley, Massachusetts.
8. Peelea, E., Sulikowski, J. and Yopak K. 2019. Hot Brains: The Effect of Temperature on Brain Development. Society for Integrative & Comparative Biology (SICB) Annual Meeting. Tampa, Fla.
9. Sulikowski, J.A., Cicia, A.M., Mandelman, J., Rudders, D., Byrner, M., Morgan, A., Curtis, T., Hoffmayer, E., Driggers, W. 2018. Using spatial ecology to reduce bycatch of sharks in the Gulf of Maine Commercial and Recreational ABFT Tuna Fishery. American Fisheries Society Annual Meeting. Atlantic City, New Jersey.

## GRADUATE AND UNDERGRADUATE STUDENT RESEARCH

Research mentor to 50 undergraduate students; Masters thesis major advisor for 15 students; PhD Dissertation Committees for 4 students, and Primary adviser for 2 PhD students.

### **Current**

#### **PhD Primary Adviser ASU:**

Brooke Anderson: Ecological niche specialization and habitat use of the Porbeagle shark within the Northwest Atlantic Ocean. Expected graduation May 2023.

Beckah Campbell: Topic TBD. Expected graduation May 2025

#### **PhD Committee Member:**

Cameron Hodgdon, University of Maine: Environmental drivers effecting the growth of American Lobster and Atlantic sea scallops in the Gulf of Maine. **Expected graduation May 2022.**

**ASU Masters Students:**

Stephanie Cassel: The Effects of Oil Spills on Fish Abundance and Diversity in the Gulf of Mexico. Expected graduation December 2021

**Past****PhD Dissertation Committees:**

John W. Mandelman. 2006. Northeastern University. Dissertation project: Stress and Survivorship in Spiny Dogfish (*Squalus acanthias*) and other Elasmobranchs: the Physiological status and Mortality associated with Fishing capture. Major Professor, Dr. Don O'Malley.

Walter Buble. University of New Hampshire. Dissertation project: New approaches to update and collect fishery specific data on spiny dogfish, *Squalus acanthias*. Major Professor, Dr. Hunt Howell.

**PhD Examiner:**

Michelle Treloar. Aspects of the life history of skates from southeastern Australia. Deakin University. Major Advisor

**Research Projects with UNE Masters Students:**

Laura Williams. Title: Hormonal synchronicity in the reproductive cycle of the little skate. Graduation, Summer 2011.

Caitlyn Little: Title: Habitat use and movement patterns of the Atlantic sturgeon in the Saco River: implications for fisheries management, spring 2012.

Angela Cicia: Title: assessing the physiological effects of air exposure and tow duration in little (*leucoraja erinacea*) and thorny (*amblyraja Radiata*) skates captured within the northwest Atlantic ottertrawl fishery, spring 2012.

Bianca Prohaska: Title: The development of a non lethal technique to study elasmobranch reproduction, Spring 2013

Amy Carlson: Title: Delineating movement patterns of spiny dogfish in the Northwest Atlantic using satellite tag technology, spring 2013

Brittany Palm: Title: Diet composition of the atlantic croaker, *Micropogonias undulatus*, sand seatrout, *Cynoscion arenarius*, and silver seatrout, *Cynoscion nothus*, with possible implications for fisheries management in the Gulf of Mexico, spring 2013.

Ryan Knotek. Title: Evaluating the Condition and Discard Mortality of Skates Following Capture and Handling in the Sea Scallop Dredge Fishery, spring 2014.

Connor Capizzano. Title: Elucidating post-release mortality and "best capture and handling" methods in sublegal Atlantic cod discarded in Gulf of Maine recreational hook fisheries, spring, 2014.

Laura Ellis: Title: Determining the sex and reproductive state of Atlantic Bluefin Tuna through the use of sex steroids extracted from skeletal muscle tissue, Spring 2018.

Amy Smith: Title: The effect of capture stress in bony fishes and its relation to discard mortality, spring 2018.

Brett Swezey: Title: Determining the Post-Release Mortality Rate and Best Capture-and-Handling Methods for Atlantic Cod Discarded in the Gulf of Maine Lobster Industry, Spring 2018.

Sarah Hylton: Title: Diet, Movement, and Reproduction of the Shortnose Sturgeon in the Merrimack River, spring 2019.

Brooke Anderson: Effects of Scallop Dredge Fishing Practices on the Physical, Behavioral, and Physiological Stress Responses of Three Flounder Bycatch Species. Fall 2019.

Hannah Verkamp: Nonlethal assessment of reproductive parameters in sharks: Studies on the blacktip shark (*Carcharhinus limbatus*) and white shark (*Carcharodon carcharias*) Fall 2019.

### **Research Projects with UNE Undergraduate Students:**

#### **2006-2007:**

Directed Study Student Kristen Kelly ('07'). A preliminary investigation into the seasonal abundance and diversity of the macrofauna within the Saco River estuary system. Results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study Student Nicole Condon ('07'). Preliminary investigation of spiny dogfish (*Squalus acanthias*) diet in the Western Gulf of Maine. Results presented at the UNE undergraduate research symposium as an oral presentation (winner best student presentation award).

Directed Study Student Angela Cicia ('08'). Age and size at sexual maturity of the smooth skate, *Malacoraja senta*, in the Gulf of Maine. Results presented at the UNE undergraduate research symposium as an oral presentation.

Research Assistant Student Marie Quinlan ('11'). Sexual dental dimorphism in the Atlantic Torpedo ray. Results presented at the UNE undergraduate research symposium as a poster presentation.

#### **2007-2008:**

Marine Biology Honors Student Angela Cicia (08). Age, growth, and maturity of the little skate, *Leucoraja erinacea*, from the western Gulf of Maine based on morphological, histological and hormone analyses. Results presented at the UNE undergraduate research symposium as an oral presentation (second place best student oral presentation).

Directed Study Student Andy Wargo ('08'). Larval fish abundance and distribution in the Saco River estuary system. Results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study Student Brittany Palm ('09'). Little skate gestation rates and the potential use of sperm storage. Results presented at the UNE undergraduate research symposium as an oral presentation.

Marine Biology Honors Student Nathan Furey ('09'). Evaluating the Saco Bay estuary system and its potential use as a nursery ground for inshore macrofaunal species. Results presented at the UNE undergraduate research symposium as an oral presentation.

### **2008-2009:**

Directed Study student Brittany Palm ('09'). The Fecundity, Viability, and Gestation Rates of Little Skate (*Leucoraja erinacea*) Egg Cases. Preliminary results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Leigh Engel ('10'). Habitat Partitioning of Juvenile Fish within the Saco River Estuary. Preliminary results presented at the UNE undergraduate research symposium as an oral presentation.

Marine Biology Honors Student Nathan Furey ('09'). Temporal Variations of the Fish Assemblage within the Saco River Estuarine Ecosystem: Determining the Role of this Habitat in the Life History of Nektonic Species. Preliminary results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Samantha Johnson ('10'). Behavior Modification & Distribution of Ichthyoplankton in the Saco River Plume. Preliminary results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Jade Heidt ('10'). Effects of Temperature & Seasonal Variation on Growth of the Neonate Little Skate (*Leucoraja erinacea*). Preliminary results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Devin Flawd ('10'). Use of Acoustic Telemetry to Track Atlantic Sturgeon Movement Patterns in the Saco River. Results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Nicole Ward ('10'). Age and Size of the Black Dogfish (*Centroscyllium fabricii*) at Sexual Maturity, A proposal for summer research. Preliminary results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Drew Rosati ('10'). Community Diversity among Adult Fish Populations and its Influence on Juvenile Survival in Maine's Saco Bay A long lining survey and IRI on species caught. Preliminary results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Jessica Bergeron ('11'). Vertical Distribution & Abundance of Larval Fish in the Saco River Estuary System Introduction of sampling techniques new to this region. Preliminary results presented at the UNE undergraduate research symposium as an oral presentation.

### **2009-2010:**

Directed Study student Leigh Engel ('10'). Habitat Partitioning of Juvenile Fish within the Saco River Estuary. Results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Samantha Johnson ('10'). Behavior Modification & Distribution of Ichthyoplankton in the Saco River Plume. Results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Jade Heidt ('10'). Effects of Temperature & Seasonal Variation on Growth of the Neonate Little Skate (*Leucoraja erinacea*). Results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Devin Flawd ('10'). Use of Acoustic Telemetry to Track Atlantic Sturgeon Movement Patterns in the Saco River. Results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Nicole Ward ('10'). Age and Size of the Black Dogfish (*Centroscyllium fabricii*) at Sexual Maturity. Results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Drew Rosati ('10'). Community Diversity among Adult Fish Populations and its Influence on Juvenile Survival in Maine's Saco Bay A long lining survey and IRI on species captured. Results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Jessica Bergeron ('11'). Vertical Distribution & Abundance of Larval Fish in the Saco River Estuary System Introduction of sampling techniques new to this region. Results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Tiffany Nordhause ('10'). Variability in little skate gestation periods based on external temperature fluctuations. Results presented at the UNE undergraduate research symposium as an oral presentation.

Directed Study student Ashley Traverse-Taylor ('10'). Investigating the physiological changes in blood chemistry of post capture adult female dogfish. Results presented at the UNE undergraduate research symposium as an oral presentation.

## **2010-2011**

Honors research student Karson Coutre ('12'). Assessing the age and size at sexual maturity of the Barndoor skate based on morphological analyses. Preliminary results presented at the UNE summer symposium as a poster presentation.

Directed Study student Eric Nuber ('12'). Sperm storage in four species of skates from the western Gulf of Maine. Preliminary results presented at the UNE summer undergraduate research symposium as poster presentation.

Honor research student Daniel Crear ('12') Age Distribution of Six Shark Species in the Mississippi Sound Nursery Ground. Preliminary results presented at the UNE summer undergraduate research symposium as poster presentation.

Honors research student Ryan Knotek ('12'). Investigating Reproductive Anomalies in the Spiny Dogfish, *Squalus acanthias*, Along the United States East Coast. Preliminary results presented at the UNE summer undergraduate research symposium as poster presentation.

Directed Study student Kayla M. Smith ('13') Monitoring seasonal variability in composition and abundance of crustacean and juvenile fish species within the Saco River Estuary. Preliminary results presented at the UNE summer undergraduate research symposium as poster presentation.

Honors research student Anna Clabaugh ('13'). Using stomach content and stable isotope analysis to identify direct and indirect impact by spiny dogfish, *Squalus acanthias*, on commercially important fish populations from Southern New England.

## **2012-2013:**

Directed Study student Kayla M. Smith ('13') Monitoring seasonal variability in composition and abundance of crustacean and juvenile fish species within the Saco River Estuary. Preliminary results presented at the UNE summer undergraduate research symposium as poster presentation.

Honors research student Natalie Ingram ('14'). The Effect of Temperature on Gestation and Survivability of the Little Skate (*Leucoraja erinacea*) in the Gulf of Maine.

Honors research student Tara Boag ('14'). Vertebral Band Enhancement of Deepwater Elasmobranch Species Using Histology

Honors research student Liese Carleton ('14'). Investigating the Factors that Control Maturation of the Oviducal Gland in Oviparous Elasmobranchs.

Honors research student Joe Langan ('15'). Evaluating the Recreational Discard Mortality of Atlantic Cod (*Gadus morhua*).

Directed Study student Carolyn Wheeler ('15'). Investigating the reproductive biology of the tiger shark using steroid hormones.

Directed Study student Ashleigh Novak ('15'). Delineating habitat partitioning and feeding habits of the Atlantic and shortnose sturgeons in the Saco River.

Directed Study student Julia Reynolds ('15'). Determining the Larval Fish Assemblage in the Saco River Watershed.

#### **2013-2014:**

Honors research student Joe Langan ('15'). Evaluating the Recreational Discard Mortality of Atlantic Cod (*Gadus morhua*).

Honors research student Carolyn Wheeler ('15'). Investigating the reproductive biology of the tiger shark using steroid hormones.

Directed Study student Ashleigh Novak ('15'). Delineating habitat partitioning and feeding habits of the Atlantic and shortnose sturgeons in the Saco River.

Honors research student Julia Reynolds ('15'). Determining the Larval Fish Assemblage in the Saco River Watershed.

Direct study Student Brenda Rudnicky ('15'). Abiotic Influences on the Juvenile Fish Assemblage of the Saco River Estuary, Maine

#### **2014-2015:**

Honors research student Joe Langan ('15'). Evaluating the Recreational Discard Mortality of Atlantic Cod (*Gadus morhua*).

Honors research student Carolyn Wheeler ('15'). Investigating the reproductive biology of the tiger shark using steroid hormones.

Directed Study student Ashleigh Novak ('15'). Delineating habitat partitioning and feeding habits of the Atlantic and shortnose sturgeons in the Saco River.

Honors research student Julia Reynolds ('15'). Determining the Larval Fish Assemblage in the Saco River Watershed.

Direct study Student Brenda Rudnicky ('15'). Abiotic Influences on the Juvenile Fish Assemblage of the Saco River Estuary, Maine.

#### **2015-2016:**

Directed Study: Erin Mohr Assessing steroid reproductive hormones in bull and blacktip sharks captured off the coast of Southern Florida.

Directed Study: Melanie Kolacy ('16'). Temperature Effect on Behavior and Neurological Development of the Little Skate

Honors Research student: Cameron Hodgdon ('17'). Seasonal movement patterns of the shortnose sturgeon (*Acipenser brevirostrum*) within the Saco River Estuary, Maine

Directed Study: Alicia Brown ('17'). Atlantic sharpnose shark (*Rhizoprionodon terraenovae*) age and growth in the Gulf of Mexico.

Directed Study: Riley Austin ('18'). Assessment of the Winter Flounder (*Pseudopleuronectes americanus*) Stock of the Saco River Estuary, Maine

Directed Study: Lars Hammer ('18'). Assessment of the Winter Flounder (*Pseudopleuronectes americanus*) Stock of the Saco River Estuary, Maine

Directed Study: Nora Wells ('18'). Assessing Reproductive Steroid Hormone Concentrations in lemon and sandbar Captured off the Coast of Southern Florida

Directed Study: Gabby Comensanas ('18'). Investigating the variability in the age structure of rainbow smelt captured in Maine river systems.

Directed Study: Hannah Sihler ('18'). Identification, distribution and prevalence of the parasite, *Nitzschia sturionis*, on Atlantic sturgeon captured within the Saco River Estuary, Maine

### **2016-2017:**

Honors Research student: Cameron Hodgdon ('17'). Seasonal movement patterns of the shortnose sturgeon (*Acipenser brevirostrum*) within the Saco River Estuary, Maine

Directed Study: Alicia Brown ('17'). Atlantic sharpnose shark (*Rhizoprionodon terraenovae*) age and growth in the Gulf of Mexico.

Directed Study: Riley Austin ('18'). An Assessment of Stress and Post Release Mortality in Bycaught Atlantic Cod in the GOM Commercial Lobster Fishery

Directed Study: Lars Hammer ('18'). Assessment of the Winter Flounder (*Pseudopleuronectes americanus*) Stock of the Saco River Estuary, Maine

Directed Study: Nora Wells ('18'). Assessing Reproductive Steroid Hormone Concentrations in lemon and sandbar sharks Captured off the Coast of Southern Florida

### **2017-2018:**

Directed Study: Riley Austin ('18'). An Assessment of Stress and Post Release Mortality in Bycaught Atlantic Cod in the GOM Commercial Lobster Fishery

Directed Study: Lars Hammer ('18'). Assessment of the Winter Flounder (*Pseudopleuronectes americanus*) Stock of the Saco River Estuary, Maine

Directed Study: Nora Wells ('18'). Assessing Reproductive Steroid Hormone Concentrations in lemon and sandbar Sharks Captured off the Coast of Southern Florida

Honors Research student: Austin Flanagan ('19'). Seasonal movement patterns of the Atlantic sturgeon (*Acipenser oxyrinchus oxyrinchus*) within the Saco River Estuary, Maine

Directed Study: Abigail Hayne ('19'). Southern stingray (*Dasyatis americana*) age and growth in southern Florida.

Directed Study: Molly Sisk ('18'). Age estimates for rainbow smelt from three distinct Maine ecosystems.

Directed Study: Jasmine Nyce: ('20'). The Use of baited underwater cameras to assess the Saco Bay fish assemblage

Directed Study: Jen Knotek: ('20'). Using an experimental long line set to assess captured stress in lamnid sharks.

### **2018-2019:**

Honors Research student: Austin Flanagan ('19'). Seasonal movement patterns of the Atlantic sturgeon (*Acipenser oxyrinchus oxyrinchus*) within the Saco River Estuary, Maine

Directed Study: Abigail Hayne ('19'). Southern stingray (*Dasyatis americana*) age and growth in southern Florida.

Directed Study: Jasmine Nyce: ('20'). The Use of baited underwater cameras to assess the Saco Bay fish assemblage

Directed Study: Jen Knotek: ('20'). Using an experimental long line set to assess captured stress in lamnid sharks.

### **Research Projects with ASU Undergraduate Students:**

#### **2019-2022**

Juliana Kaloczi ('23'): Reproductive Biology of the Plownose Chimaera off central Chile

Sarika Sawant: ('23'): Assessing Reproductive Steroid Hormone Concentrations of the Lemon Shark, and Sandbar Shark Captured off the Coast of Southern Florida

Deion Sabion ('23') Reproductive Biology of the Sandbar Shark within the Southeast Atlantic Ocean

Taeler Jones ('21') Caribbean Shark Reproductive Biology

Nisi Jara-Aguirre ('21'): Assessing Reproductive Steroid Hormone Concentrations of the Bull Shark, Captured off the Coast of Southern Florida

Amanda Einig ('21'): Analysis of reproductive hormones in Porbeagle Sharks in the Northwest Atlantic Ocean
