Spring

Evolution (Level IV); Genes Development & Evolution (Level IV); Applied Molecular Genetics/Genomics (Level IV); Microbiology (Level II)

Mentorship I mentor students for their Undergraduate Research projects. Of late, my mentored students presented their research at the 65th Annual Arizona-Nevada Academy of Sciences Meeting on April 12, 2024, at ASU West Valley, entitled *Vascular Endothelial Growth Factor A (VEGFA) Promoter -634G>C Polymorphism Confers Protection Against Osteosarcoma and Renal Cell Carcinoma: A Comprehensive Meta-Analysis*. In addition, they showcased their work at the international Environmental Mutagenesis and Genomics Society (EMGS) meeting in Palm Springs, California, on September 9, 2024. The EMGS presentations included a comprehensive meta-analysis on thyroid cancer susceptibility by Ngoc Bao Phuong Ho and a systematic review on endometriosis susceptibility by Dipti Pant.

Research: Publication In 2024, I have co-authored one original research article titled "*Organochlorine pesticides disrupt T helper cell regulation and reduce IL-2 and IFN-γ favoring infection and production of autoantibodies among pemphigus patients*" in *Toxicology in Vitro* (March 2024). Additionally, I co-authored two review articles: "*Exosomes in Vascular/Neurological Disorders and the Road Ahead*" in *Cells* (April 2024), and "*The Impact of Artificial Intelligence on Microbial Diagnosis*" in *Microorganisms* (May 2024). I also contributed to three abstracts: "*Remote ischemic post-conditioning (RIC) mediates neuroprotection in murine traumatic optic neuropathy (TON)*" published in *Investigative Ophthalmology & Visual Science, Abstract TP303: Perfluorocarbon Oxygen Limits Functional Impairment and Brain Damage Following Subarachnoid Hemorrhage*, and *Abstract WP294: Endothelial Deletion of Complement C3a Receptor is Neuroprotective in Murine Stroke*, both published in *Stroke*.

Funding Recently, as Co-Principal Investigator (Total PI- 2), I have received \$125,000 funding from the Neurodegenerative Disease Research Center for the fiscal year of 7/2024-6/2025, to elucidate the association between the APOE gene and the onset of Parkinson's disease dementia (PDD), establishing an evidence-based understanding of how different APOE genotypes influence PDD risk. This study will provide a better assessment of APOE-related risk factors. Additionally, I will explore the correlation between lymphocyte subsets, NK cells, and Parkinson's disease (PD) to offer new insights into its pathogenesis.

Editing Currently, I am editing two special issues: *Molecular Mechanisms and Novel Treatments of Stroke*, a special issue of *Biomolecules* (ISSN 2218-273X) under the section "Molecular Biology," ending in 2/ 2025 and *Cellular Mechanisms of Therapy Resistance and Metastasis in Breast Cancer*, a special issue of *Cells* (ISSN 2073-4409) under the section "Cellular Pathology," ending in 12/ 2024.

Service On service front, I am part of the Mental Health Committee as we prepare for a focus group study, planned for Spring 2024, to explore specific barriers students face in accessing health and mental health care, building on our early findings. This will include creating question lists, training administrators, determining recruitment methods, and possibly submitting a new IRB protocol to repeat the survey biannually. I am also part of the Arizona State University at Lake Havasu / Lake Havasu Church of the Nazarene After-School Tutoring Program, where we provide academic support to local students. This initiative aims to enhance student learning by offering tailored guidance and assistance in various subjects.
